

Information for Undergraduate Students

126

The undergraduate program leads to a four-year Bachelor of Science degree. Admitted students matriculate in the fall term only. Caltech does not have a summer session or part-time program, and cannot consider you if you already have a bachelor's degree from another college, university, or the equivalent. If you have matriculated at any college, university, or the equivalent in a program leading to any degree, you will probably be required to apply as a transfer student, and should read the requirements in the section titled "Transfer Admissions."

ADMISSION TO THE FRESHMAN CLASS

Students are admitted to the freshman class on the basis of strong academic performance in a rigorous course of college preparatory study, especially in the areas of math and science; results of the SAT or ACT, and one SAT science subject test and the SAT mathematics level 2 test; teacher and counselor evaluations; personal characteristics; a demonstrated interest in math, science, or engineering; and information provided on the application.

Applying

Information on the application process can be found on the admissions office website at <http://www.admissions.caltech.edu>. Students are encouraged to apply online through the Common Application. For further information on admission, please call (626) 395-6341 or e-mail ugadmissions@caltech.edu. To be considered for admission, applications to the freshman class must be submitted online or postmarked by January 2.

Early Action

The Early Action application process requires that the completed application be postmarked or submitted online by November 3. Under this application plan, students will be notified in mid-December of the admission decision. Students admitted under Early Action have until May 1 to make their commitment to attend.

High School Requirements

Students are expected to prepare for Caltech by successfully completing the following curriculum:

- Four years of mathematics (including calculus)
- One year of physics
- One year of chemistry
- Three years of English (four years recommended)
- One year of U.S. history/government (waived for international students)

127

Standardized Exams

Applicants are required to take the following standardized tests by the October test series for Early Action consideration, and by the December test series for Regular Decision consideration:

SAT or ACT

SAT mathematics level 2

One of the following SAT subject tests: Biology, Chemistry, or Physics.

Information regarding the College Board examinations can be found in the Bulletin of Information, which may be obtained without charge at most high schools, or by contacting the College Board, 45 Columbus Avenue, New York, NY 10023-6992; (609) 771-7600; sat@info.collegeboard.org; or <http://www.collegeboard.com>. For ACT, 500 ACT Drive, P.O. Box 168, Iowa City, IA 52243-0168; (319) 337-1270; <http://www.act.org>.

Essays

The essays, which are required as a part of the application, are intended to provide students the opportunity to communicate their interests, experiences, and background. Since Caltech is interested in learning about each applicant, the essays are viewed as an important part of the admission decision process.

Evaluations

Two evaluations and a Secondary School Report are required. One must be from a math or science teacher, and one from a humanities or social science teacher (see the instructions in the application). A Secondary School Report must be filled out by the applicant's high-school counselor or other school official.

Additional Material

Descriptions of research projects and hands-on science and engineering experience are helpful, as is material that demonstrates experiences outside math and science. Additional material should be identified with name and date of birth.

Acceptance

Caltech is a National Association for College Admissions Counseling member and therefore agrees to comply with the candidate's reply date of May 1. Places in the entering class will not be held after May 1. Early Action applicants will be informed of their status in mid-December, and Regular Decision applicants will be informed by April 1.

Deferral of Entrance

For reasons of travel or work, Caltech will consider requests from admitted students for a one-year deferral of entrance. Students

who request a deferment must submit a written request stating the purpose of postponement.

Advanced Placement, International Baccalaureate, and College Credit
Caltech encourages all prospective undergraduate applicants to prepare by challenging themselves with the most rigorous course of study available, including the Advanced Placement (AP) and International Baccalaureate (IB) programs. However, college credit for AP or IB classes is not automatic. Course credit and/or placement in an accelerated program is *sometimes* granted as deemed appropriate by the department faculty. The awarding of Caltech course credit takes place at the time of registration each fall.

Biology

Prospective biology majors who pass both Bi 8 and Bi 9 in their freshman year are considered to have met the core requirement of Bi 1.

Chemistry

In exceptional cases, students with a particularly strong background in chemistry may elect to take Chemistry 21, the Physical Description of Chemical Systems, or Chemistry 41, Organic Chemistry, rather than Chemistry 1, General Chemistry. It is assumed that such students have reasonable competence in the following areas: 1) elementary theories of atomic structure and electronic theories of valence, 2) chemical stoichiometry, 3) computations based upon equilibrium relationships, and 4) elementary chemical thermodynamics. For those students who qualify for advanced placement in chemistry, the Institute requirement of 15 units of Ch 1 ab can be satisfied by completing with passing grades two terms of (i) Ch 21 abc (9 units each term), or (ii) Ch 41 abc (9 units each term). The student's qualification for advanced placement in chemistry will be determined by performance on a placement examination to be administered in the summer prior to registration and on subsequent approval by the instructors of the courses to be taken and the courses to be substituted. Similarly, qualified students, with the instructor's consent, are allowed to substitute either Ch 3 b or Ch 4 a for the "core" chemistry laboratory requirement (Ch 3 a).

English/Writing

All incoming students (freshmen and transfers) must submit a placement essay to determine whether they are adequately prepared for the substantial writing component that is part of all freshman humanities courses. Most new students participate in a web-based version of this assessment, which is usually conducted in early June. A makeup assessment is held just before fall classes begin. Based on results of this writing assessment, students may be required to take En 1 a or En 2 before enrolling in a freshman

humanities class. (En 1 ab and En 2 count for general Institute credit only.)

Mathematics

During the summer before the freshman year, entering freshmen are asked to take a diagnostic exam in basic calculus that will determine which students will be placed in a special section of Ma 1 a for those with less complete preparation, and later take Ma 1 d; and if they are interested in advanced placement, they may also take an examination to determine whether they will begin the mathematics core sequence at an advanced level.

Normally, an entering freshman takes Ma 1 abc, Calculus of One and Several Variables and Linear Algebra. This course covers the calculus of functions of one and several variables; infinite series; vector algebra; basic and advanced linear algebra; derivatives of vector functions, multiple integrals, line and path integrals; and theorems of Green and Stokes. The course is divided into a lecture part and a recitation part that focuses mainly on problem-solving.

Students in need of additional problem-solving practice may be advised to take Ma 8 (in addition to Ma 1 a) in the first quarter.

Physics

The required freshman physics course, Ph 1 abc, is considerably more rigorous than most advanced placement work, and entering freshmen are encouraged to take Ph 1. A test is administered during the summer to aid in the organization of Ph 1; students who have performed particularly well can discuss the possibilities for advanced placement with the physics representative during orientation. A second test may then be required.

New Student Orientation

All freshmen and transfer students are expected to attend the New Student Orientation as a part of the regular registration procedure.

The orientation takes place the week prior to the beginning of classes. A large number of faculty members and upperclass student leaders participate, helping to introduce the new student to the Caltech community. The orientation period provides an opportunity for the new student to become acquainted with the campus, the Honor System governing personal conduct, and other aspects of life at Caltech. In addition, he or she can meet classmates, upperclass students, and faculty. Thus the new student can begin to feel at home at Caltech and to share in the common agreement on intellectual and moral standards before the pressure of academic work begins.

ADMISSION TO UPPER CLASSES BY TRANSFER

Transfer Admissions

Caltech admits transfer students for the fall term only. We require a completed application, letters of recommendation, an official transcript from the last secondary school attended and all colleges or universities attended, descriptions of all college-level math and science courses, and completion of the Caltech Transfer Entrance Examinations. Please review the section titled "Eligibility Criteria for Admission" to determine whether you meet the eligibility requirements for transfer admissions consideration.

Academic Preparation

The following is a list of the Caltech core curriculum, taken by all Caltech students during their first two years. It is expected that transfer students will have had exposure to mathematics and science courses on a comparable level prior to entry to Caltech. Any of the following core courses that have not been covered by incoming transfer students must be taken upon matriculation to Caltech. There are no specific topics expected to have been covered in humanities and social science classes.

An evaluation of each transfer student's written English is required prior to registration and may result in an additional course requirement.

Freshman courses:

Mathematics 1 abc
Physics 1 abc
Chemistry 1 ab
Chemistry 3 a
Biology 1
Humanities and Social Science electives
Menu science class (see page 177; can be taken freshman or sophomore year)

Sophomore courses:

Mathematics 2 ab
Physics 2 ab or Physics 12 abc
Additional laboratory science
Humanities and Social Science electives

Eligibility Criteria for Admission

The Institute admits to its sophomore and junior classes a small number of students who have excellent records at other institutions of collegiate rank and who perform satisfactorily on the Caltech Transfer Admissions Entrance Examinations.

- Students must have completed their secondary school education, and have subsequently enrolled at a college or university

and earned credit, in order to be considered for transfer admission.

- Transfer students are not admitted to the senior year at Caltech.
- Students who have already completed a bachelor's degree in any subject are not eligible for transfer.

Standardized Test Requirements

Transfer applicants are not required to submit SAT scores. The Test of English as a Foreign Language (TOEFL) is required of transfer applicants whose native language is not English and who have not been studying in an English-speaking country for two years or more. The TOEFL should be taken by the February test date.

Evaluation of Written English

All entering transfer students will be required to undergo an evaluation of their written English prior to enrolling.

Transfer Admissions Entrance Examinations

All applicants are required to take Caltech Transfer Admissions Entrance Examinations in mathematics and physics. Further instructions are included with the Caltech Transfer Application.

Transfer of Credit

The courses for which transfer applicants will receive credit, and the corresponding class standing, will be determined at the time of enrollment. Faculty members review each course submitted for credit on an individual basis. It is not possible, therefore, to answer questions regarding the acceptability of coursework taken elsewhere. If the standard of work taken elsewhere is uncertain, additional examinations may be required before the question of credit is finally determined.

Graduation Requirements

Admitted transfer students must meet the following requirements in order to receive a Caltech Bachelor of Science degree.

- Regardless of the amount of credit awarded upon matriculation, transfer students must spend at least two years (six terms) in residence at Caltech. Students must also earn at least 216 units at Caltech, not including courses taken to satisfy math and science core curriculum requirements.
- Students must take, or have taken the equivalent of, all core curriculum courses.
- Students must satisfy all of their chosen option's degree requirements. Transfer students may choose from among all Caltech undergraduate options.

Admissions Application

Applications are available September 1. Completed applications should be received by the Office of Undergraduate Admissions by February 15. Applicants will be notified of the decisions of the Admissions Committee in early May. Questions about transfer admission and application should be directed to Transfer Information, Office of Undergraduate Admissions, Caltech, Mail Code 1-94, Pasadena, CA 91125, U.S.A.; (626) 395-6341; ugadmissions@caltech.edu. Applications may also be downloaded from the admissions website at <http://www.admissions.caltech.edu>.

The 3/2 Dual Degree Plan

Caltech invites students from a select group of liberal arts colleges to transfer to Caltech upon completion of their junior year. After two years in residence at Caltech, and the successful completion of our requirements, 3/2 students will be granted a Bachelor of Science degree from Caltech and a second bachelor's degree from their liberal arts college. Students may transfer into any of the Caltech options.

Students from the following institutions are eligible to apply to the 3/2 program:

Bowdoin College (ME)	Ohio Wesleyan University (OH)
Bryn Mawr (PA)	Pomona College (CA)
Grinnell College (IA)	Reed College (OR)
Haverford College (PA)	Spelman College (GA)
Mt. Holyoke College (MA)	Wesleyan University (CT)
Oberlin College (OH)	Whitman College (WA)
Occidental College (CA)	

Applications and a program description are available from the 3/2 liaison at each of the liberal arts college partners and from the Caltech Office of Undergraduate Admissions. Deadline for submission of 3/2 applications and support materials is April 1.

Admission to the 3/2 program is not guaranteed and will be determined by the Caltech Faculty Upperclass Admissions Committee. Students applying should have a record of superior academic achievement at their home institutions, and strong letters of recommendation from their 3/2 liaison and an additional faculty member. They must have completed a minimum of one year of calculus-based physics and mathematics (two years are recommended) including multivariable calculus and differential equations, and one year of chemistry.

Exchange Programs

Exchange programs exist with Occidental College and Art Center College of Design, permitting Caltech students to receive credit for courses taken at these colleges. Students from these colleges

also may receive credit for courses taken at the Institute. Tuition payments are not required, but the student may have to pay any special fees. The student must obtain approval from the instructor of the exchange course. Exchange courses taken by Caltech students must have prior approval by the student's option, by the division providing courses most similar to the proposed course, and by the registrar. Students wishing to take such courses should obtain the appropriate form at the Registrar's Office, get the required signatures as above, and return it to the registrar. Freshmen at Caltech ordinarily cannot participate in this exchange.

Visiting Student Program

A limited number of students from other institutions of collegiate rank may enroll at Caltech to take classes for up to one year. These students are classified as visiting students and will not receive Caltech degrees. Applicants should have an excellent academic record and be recommended by their home institutions. Visiting students are responsible for all costs, including Caltech's tuition and fees. Accommodations in Institute housing depends on availability. Decisions on admission are made by the Office of the Dean of Students, and prospective visiting students should contact this office by April 1 to apply for fall enrollment.

STUDY ABROAD

Study abroad allows students to gain a first-hand experience of life in countries abroad and also gain a broader exposure in science, engineering, management/economics, and the liberal arts. Students who study abroad develop an international viewpoint that transfers over to their education at Caltech and to their graduate study and future career regardless of the field they pursue professionally.

Please see the Financial Aid section of the Catalog for details on applying for and eligibility for financial aid related to study abroad. Note that supplemental charges and travel should be listed by the student in their financial-aid budget so that these amounts can be considered when funding is calculated.

Additional information including application procedures and exact deadline dates is available from the Fellowships Advising and Study Abroad Office at <http://www.fasa.caltech.edu>.

Cambridge Scholars Program

The Caltech Cambridge Scholars Program offers qualified juniors and seniors the opportunity to spend a fall or winter term at the University of Cambridge in England. Students are hosted by and live in one of the Cambridge Colleges participating in the program. The participating colleges are Corpus Christi, Pembroke,

St. Catharine's, and St. John's. Students pay Caltech room, board, tuition, and other standard Caltech fees for the term. There is a supplemental charge for room and board. The supplement varies yearly depending on prices and the exchange rate.

Students are admitted into one Cambridge department in the biological sciences, physical sciences, computer sciences, mathematics, engineering, or economics to take classes within the tripos, i.e., subject, offered by that department. Students may only take courses in one subject area, unless special permission is granted, and this is usually granted by Cambridge if a student needs a course to fulfill a Caltech option requirement. Students will find more information on the tripos structure and Cambridge University in the Fellowships Advising and Study Abroad Office or at <http://www.cam.ac.uk>.

During the term at Cambridge, students take the equivalent of at least 36 Caltech units, usually four Cambridge courses, but may take five in most cases. The exact number of courses depends on Cambridge departmental requirements. For their classes, students receive a minimum of 36 Caltech units that can be used for general or option credit. Note that the final number of units and whether the units can be used to fulfill departmental requirements will be determined after faculty review upon a student's return to Caltech.

Caltech students have the use of all Cambridge facilities and are matriculated into the university for the term. A minimum 3.2 GPA is required to apply. Eligible sophomores and juniors interested in either the fall or winter term should apply by February 1 for the next academic year.

Copenhagen Scholars Program

The Caltech Copenhagen Scholars Program offers qualified juniors and seniors the opportunity to spend the fall at the University of Copenhagen (KU) or the Danish Technical University (DTU). At KU students may concentrate in the physical sciences, mathematics, biological sciences, or economics. At DTU students can take courses in engineering or the applied sciences as well as the sciences—chemistry, physics, and math, among others, are also taught at DTU.

Students live in a modern dormitory with Danish students. There is a supplemental charge for the room because the Copenhagen semester is 15 weeks long plus one week of fall vacation. The supplement varies yearly depending on prices and the exchange rate.

There is no board plan, but each hall has a well-equipped kitchen, and students may cook for themselves or with the other students. Aside from the supplemental room charge, all students pay standard board and tuition, but should budget additional funds for food due to the length of the semester. Note that while students pay Caltech board fees, each student participating in this

program is given the board fee in the form of a check, to spend on food while in Copenhagen. Caltech fees are due by the normal fall due date.

Both KU and DTU are on a semester system, and Caltech students attend from around August 25 to mid-December. Students have a one-week vacation in mid-October, and many use this vacation week to travel in Denmark or Europe. DTU students attend a one-week orientation the last week of August, and students going to KU have an advice and orientation period the last week of August.

Students take two to four courses in their Caltech option or a closely related subject and a course in the Danish language. Students attending Copenhagen University are required to take the course in Danish culture, but may substitute or take in addition a course taught in English on subjects such as the Danish monarchy, Danish architecture, Danish film, or the Vikings, depending on what is offered that fall. Students who will be studying primarily at DTU are required to take the Danish-language course and may audit or take for credit a course in Danish culture or take one of the courses noted above. The Danish-culture course, in addition to weekly lectures, offers field trips to interesting cultural and historical sites in the city and surrounding area. All upper-level undergraduate or beginning graduate level courses at KU and DTU can be taught in English. More information can be found at <http://www.dtu.dk> or <http://www.ku.dk>.

For this work, students receive a minimum of 36 Caltech units that can be used for general or option credit. Note that the final number of units and whether the units can be used to fulfill departmental requirements will be determined after faculty review upon a student's return to Caltech.

Students can enroll in an optional three-week-long Danish-language course that is given the first three weeks of August. There is no charge for this course. The course is not required.

A minimum 3.0 GPA is required to apply. Eligible sophomores and juniors should apply by February 1 for the fall semester at KU or DTU.

Edinburgh Scholars Program

The Caltech Edinburgh Scholars Program offers qualified juniors and seniors the opportunity to spend the fall at the University of Edinburgh. The University of Edinburgh is on a semester system, and Caltech students attend from mid-September to mid-December. All students are required to attend a weeklong orientation held the week before classes start. All students live in university dormitories, which are a short walk from George Square (humanities and social sciences) and the King's Buildings (the science and engineering campus).

Students pay Caltech room, board, tuition, and other standard Caltech fees for the term. There is a supplemental charge for housing due to the longer length of the term. The supplement varies yearly depending on prices and the exchange rate.

Students are admitted into one of Edinburgh's academic departments in the College of Science and Engineering. Note that students cannot be admitted into the economics department, but can take 20 credits in that department. Students whose option is BEM or economics may be allowed upon request to take 40 credits in economics in order to fulfill the BEM or economics option requirements.

Students take a minimum of 60 Edinburgh credits per semester and a maximum of 80 credits, but no more than five courses. Students will take a minimum of 40 credits in their option or another science or engineering subject and can take 20 credits (one course) in the College of Humanities and Social Sciences. Note that 60 credits is the standard course load, but most Caltech students take 70 to 80 credits. Note that at least 36 Caltech units must be taken.

A minimum 3.0 GPA is required to apply. Eligible sophomores and juniors should apply by February 1 for the fall semester at Edinburgh.

London Scholars Program

The Caltech London Scholars Program offers qualified juniors and seniors the opportunity to spend the fall at University College London, which is located in the lovely Bloomsbury area of London. University College London (UCL) is on a semester system, and Caltech students attend from about the third week of September to mid-December. All students are required to attend an orientation (Wednesday evening through Friday/Saturday) before classes start. All students live in a UCL dormitory, which is located within a short walk of the academic buildings of the campus. Students pay Caltech room, board, tuition, and other standard Caltech fees for the term. There is a supplemental charge for housing/board due to the longer length of the term. The supplement varies yearly depending on prices and the exchange rate.

Students are admitted into one of UCL's academic departments in the physical, life, or engineering sciences. Note that students cannot be admitted into the economics department, but can be admitted into the statistical sciences department, which offers many economics courses. Note that students can take up to two courses in the economics department.

Students take two courses in their admitting department. Usually the admitting department is in a subject area that best corresponds to the student's Caltech option, but there is some leeway in this provided the student has the background to be admitted. Note that students can be admitted to two departments and take one course in each if there is a compelling reason, e.g., a dual option or the need to fulfill a course requirement.

An additional two to three courses up to 2.5 UCL credits can be taken in departments other than the admitting department. A typical UCL semester class is .5 course units, but some classes are noted as .25, especially in engineering. Caltech students must take a minimum load of 2 UCL credits during their semester at UCL and a maximum of 2.5 UCL credits. This would be equivalent to 36 to 45 Caltech units. UCL classes can be used for general or option credit. Note that the final number of units and whether the units can be used to fulfill departmental requirements will be determined after faculty review upon a student's return to Caltech.

A minimum 3.0 GPA is required to apply. Eligible sophomores and juniors should apply by February 1 for the fall semester at UCL.

ROTC

Air Force Reserve Officer Training Corps (AFROTC) offers two-, three-, and four-year programs leading to a commission as a second lieutenant in the United States Air Force. The AFROTC program is open to almost all students pursuing baccalaureate and graduate degrees. Classes consist of one hour of academics and two hours of leadership laboratory per week for freshmen and sophomores, and three hours of academics and two hours of leadership laboratory per week for juniors and seniors. AFROTC offers a variety of one- to four-year scholarships valued at up to 100 percent of annual tuition, along with a nontaxable monthly stipend. Air Force ROTC is offered on the campuses of the University of Southern California, California State University San Bernardino, Harvey Mudd College, Loyola Marymount University, and the University of California, Los Angeles. You do not need to be a student at any of these colleges to attend AFROTC on their campuses. For more information contact the Department of Aerospace Studies at (213) 740-2670 or visit <http://www.usc.edu/afrotc>. No military commitment is incurred until entering the junior year of the program or receipt of a scholarship after the freshman year.

The Army ROTC program at USC offers four-, three-, and two-year scholarships that pay tuition costs up to \$17,000 a year. In addition, the program pays all contracted cadets a stipend of \$2,500 to \$4,000 a year and an annual book allowance of another \$600. High-school students need to apply for the four-year scholarship during the fall of their senior year, and no later than November 15. All Caltech students interested in an Army ROTC three- or two-year on-campus scholarship need to apply early in their spring semester, and no later than March 15, for the next academic year. Completion of the program leads to a commission as a second lieutenant in one of 17 occupational branches in the Regular Army, Army Reserve, or the National Guard. These schol-

arship provisions are subject to change, and interested students are encouraged to contact the Department of Military Science at the University of Southern California for further information: PED 110, Los Angeles, CA 90098, (213) 740-1850.

REGISTRATION REGULATIONS

Procedures

Students must register on the dates specified in the academic calendar. Students are not registered until they have both

- enrolled in an approved list of courses, *and*
- made satisfactory arrangements with the Bursar's Office for the payment of all fees due the Institute.

Any student who has not completed both phases of registration within one week after the first day of classes will be removed from the Institute rolls.

Students are required to maintain continuity of registration until the requirements for the Bachelor of Science degree are fulfilled, except in the case of an approved undergraduate student sabbatical. If continuity is broken by withdrawal, reinstatement is required before academic work may be resumed.

Changes in Registration

All changes in registration must be reported to the Registrar's Office by the student prior to the published deadlines. A grade of F will be given in any course for which a student registers and which he or she does not either complete satisfactorily or drop. A course is considered dropped when a drop card is completed and returned to the Registrar's Office. A student may not at any time withdraw from a course that is required for graduation in his or her option, without permission of the registrar.

A student may not add a course after the last day for adding courses, or withdraw from a course after the last date for dropping courses, without the approval of the Undergraduate Academic Standards and Honors (UASH) Committee. Registration for added courses is complete when an add card, signed by the instructor and the student's adviser, has been filed in the Registrar's Office. No credit will be given for a course for which a student has not properly registered. The responsibility for submitting drop cards and add cards to the Registrar's Office before the deadlines for dropping or adding courses each term rests entirely with the student. Failure to fulfill the responsibility because of oversight or ignorance is not sufficient grounds to petition for permission to drop or add courses after the deadline. It is the policy of the UASH Committee that no petitions for the retroactive dropping or adding of courses will be considered except under very extenuating circumstances.

Humanities Drop Policy

Students who do not attend the first class of the term will be automatically dropped from the class. Students who notify the instructor in advance of their inability to attend the first class may remain enrolled in the class at the instructor's discretion.

Summer Research or Summer Reading

Qualified undergraduate students who are regular students at the Institute are permitted to engage in research or reading during the summer, but in order to receive academic credit the student must have the approval of his or her division and must complete the registration process for such summer work before June 1. An undergraduate may not receive payment for research carried out for academic credit. Students who are registered for summer research or reading will not be required to pay tuition for the units. A student may apply up to 18 units of summer research per summer and 36 units in total toward Institute graduation requirements.

The Institute recognizes that students may want to take advantage of paid internships that provide unique off-campus educational opportunities that integrate and enhance the classroom experience. Students are encouraged to explore and discuss such opportunities with their academic adviser and the dean or associate dean of students. If appropriate, the adviser and dean or associate dean can approve such internships as integral to a Caltech educational experience. There is no academic credit for such work. The internships should commence after the end of the third term and end prior to the resumption of classes in the fall.

Undergraduate Student Sabbatical

An undergraduate student sabbatical must be sought by written petition, which must be accompanied by a completed withdrawal card. The dean or associate dean of students may grant a sabbatical provided (a) the student is in good standing, in other words does not have to meet special academic requirements as a result of reinstatement, (b) the sabbatical is for one year or less, although special circumstances can be considered, and (c) the sabbatical extends over a period that includes at least one full term.

The dean or associate dean may also grant a leave for medical reasons provided the petition is recommended by the senior director of health and counseling services. Return from a leave for medical reasons also requires the recommendation of the senior director of health and counseling services, and the final approval of the dean or the associate dean. A student returning from a leave for medical reasons will maintain the same academic standing that he or she had previously.

Involuntary Leave

The dean of students may place a student on an involuntary leave if persuaded by the evidence that such action is necessary for the protection of the Institute community or for the personal safety or welfare of the student involved. The withdrawal card may state a specific date after which the student may return or it may be indefinite as to term. The dean of students may stipulate conditions that must be met before the student may return. These conditions might include a letter of recommendation from the senior director of health and counseling services. A decision by the dean to place a student on involuntary leave is subject to automatic review within seven days by the vice president for student affairs (or his or her designee).

Withdrawal from the Institute

Formal separation from the Institute is effected by filing a completed withdrawal card in the Dean of Students Office to be forwarded to the registrar and other appropriate offices. The effective date of a withdrawal is entered by the dean or associate dean of students. A student leaving the Institute at any time during the term without filing a formal withdrawal card will not be considered withdrawn. In such a case, any grades reported by the instructors will be recorded on the official transcript, and the grade of F will be recorded for all other courses. A student who withdraws, or is absent for a term (or longer), without an approved undergraduate student sabbatical, must petition for reinstatement to return to the Institute. Return from involuntary leave requires approval through the Dean of Students Office. Reinstatement rules are listed under scholastic requirements. If the withdrawal occurs after Add Day of any term, a W (standing for "withdrawn") will be recorded on the student's transcript for all courses in which the student is enrolled. A grade of W is not included in the computation of the student's grade-point average. The record will also indicate whether an undergraduate student sabbatical was granted.

SCHOLASTIC REQUIREMENTS

.....

All undergraduates are required to meet certain scholastic standards as outlined below.

Eligibility for Registration

Eligibility to register is determined by the student's record as of the first day of classes of the term in which registration is sought. Undergraduates who register for programs that make it appear they are no longer candidates for a B.S. degree or who are not making satisfactory academic progress may be refused further registration by the Undergraduate Academic Standards and Honors (UASH) Committee.

Freshmen are ineligible to register for subsequent terms

- if they have accumulated 24 or more units of E or F, exclusive of PE;
- if they have accumulated three or more course grades of E or F, exclusive of PE;
- if, in any term of their freshman year following a reinstatement, they obtain six or more units of E or F, exclusive of PE.

Ineligible freshmen must petition the UASH Committee for reinstatement if they wish to continue as students. The dean of students or associate dean may act on a petition if (i) it is the student's first ineligibility and (ii) the student has received fewer than 42 units of E or F, exclusive of PE. For other petitions, action must be taken by the UASH Committee.

Undergraduate students, except first- and second-term freshmen, are ineligible to register for another term

- if they fail during any one term to obtain a grade-point average of at least 1.4, or if they receive 27 or more units of E or F, exclusive of PE, during any one term;
- if they fail to obtain a grade-point average of at least 1.9 for the academic year, or if they accumulate 45 or more units of E or F, exclusive of PE, over the academic year (students who have completed at least three full terms of residence at the Institute and have been registered for their senior year shall no longer be subject to the requirement that they make a grade-point average of at least 1.9 for the academic year—seniors must, however, receive a grade-point average of at least 1.4 or receive fewer than 27 units of E or F each term);
- if they have completed fewer than 36 units in the previous term and fewer than 99 units in the previous three terms in residence;
- if, once reinstated, they fail to complete a full load of at least 36 units in the following term with a grade-point average of at least 1.9.

If a late grade makes a student ineligible after the start of the next term, the official transcript shall show the ineligibility and a reinstatement. If the late grade is reported to the registrar before midterm deficiency notices are due for the subsequent term, the student shall be held to the requirement as above to complete a full load of at least 36 units with a grade-point average of at least 1.9.

If a late grade received on or before the last day for adding classes makes a reinstated student eligible, the ineligibility and the reinstatement will be removed from the student's record.

No student ineligible to register on the first day of classes will be permitted to register unless a petition for reinstatement has been submitted and acted upon.

Students ineligible for registration because of failure to meet the requirements stated in the preceding paragraphs may submit a

petition to the UASH Committee for reinstatement, giving any reasons that may exist for their previous unsatisfactory work and stating any new conditions that may lead to better results. Each such petition will be considered on its merits. *For the first such ineligibility*, the petition may be acted on by the dean of undergraduate students, after consultation with the student and examination of the record. At the dean's discretion, such cases may be referred to the UASH Committee for action. *All subsequent reinstatements must be acted upon by the Committee.* A second reinstatement by UASH will be granted only under exceptional conditions.

Departmental and Option Regulations

Selection of Option

By the middle of the third term, freshmen must notify the Registrar's Office of their selection of an option in engineering, humanities, social sciences, or science to be pursued in subsequent years. Upon the selection of an option, a freshman will be assigned an adviser in that option, whose approval must then be obtained for registration for the following year.

Undergraduate students may request to add an approved minor to their program of study. The request for a minor must be approved by the option representatives of the student's option and proposed minor. A plan must be presented which meets the minimum requirements for both the option and the minor, but the option representatives may impose additional requirements as well. The approved request must be submitted to the registrar before the start of the senior year. Any changes to the approved program will require approval by both advisers.

In exceptional circumstances an undergraduate may be allowed to major in two options for the Bachelor of Science degree. In order to do so the student must present a rationale for the double option and a plan of study leading to completion of the degree in four years. The plan, and any substantive modifications, must be approved by a committee composed of the option representatives of the two options. The plan must meet the minimum requirements for both options as set forth in this *Catalog*, but the committee may impose additional requirements as well. The approved plan should be submitted to the registrar during the sophomore year, but in any case no later than the start of the senior year. The student will then be assigned an adviser by each option. Consult the registrar for appropriate procedures.

Continuing in an Option

Students whose grade-point averages are less than 1.9 at the end of an academic year in a specific group of subjects designated by their department or option may, at the discretion of their department, be refused permission to continue the work of that option. Such disbarment does not prevent the students from continuing in some

other option or from taking additional courses to raise their average in their original option. Students without an option will fall under the direct jurisdiction of the dean of students. Students may remain without an option for no more than one year.

Change of Option

An undergraduate in good standing at the Institute shall be permitted to transfer into any option of his or her choice provided he or she has (a) a 1.9 GPA in subjects required for graduation in that option or in a specific group of subjects designated by that option or (b) permission of the option representative or committee.

A change of option is effected by obtaining a Change of Option petition from the Registrar's Office. The completed petition must then be signed by the option representative for the new option (who will assign a new adviser), and filed with the Registrar's Office. Institute regulations require that a student who has made normal progress at the Institute be able to change options at any time up to the end of the sophomore year without penalty either as to time until graduation or as to excessive unit requirements in any term.

144

Term Examinations

Term examinations will be held in all subjects unless the instructor in charge of any subject shall arrange otherwise. No student will be exempt from these examinations. When conflicts exist in a student's schedule, it is the student's responsibility to report the conflict to the instructor in charge of one of the conflicting examinations and make arrangements for another time.

Satisfactory Academic Progress

A student will be declared ineligible to register if he or she has completed fewer than 36 units in the previous term and has completed fewer than 99 units in his or her three most recent terms in residence.

Graduation Requirement

To qualify for graduation a student must complete the prescribed work in one of the options with a passing grade in each required subject and with a grade-point average of 1.9. A grade of F in an elective course need not be made up, provided the student has received passing grades in enough other accepted units to satisfy the minimum total requirements of the option.

Candidacy for the Bachelor's Degree

A student must file with the registrar a declaration of candidacy for the degree of Bachelor of Science on or before the first Monday of November preceding the date on which he or she expects to receive the degree. All subjects required for graduation,

with the exception of those for which the candidate is registered during the last term of his or her study, must be completed and the grade recorded, by the second Monday of May preceding commencement.

Graduation in the Normally Prescribed Time

Any undergraduate student who fails to complete the requirements for graduation at the end of 12 terms must petition the Undergraduate Academic Standards and Honors Committee for approval to register for further work each term.

Requirement for a Second Bachelor of Science Degree

Under exceptional circumstances a student may be permitted to return to study for a second Bachelor of Science degree. To receive this permission the student must petition the Curriculum Committee. If the petition is approved, the student must then register for three consecutive terms of additional study, completing in each term at least 36 units, and must meet all the requirements for graduation in the second option. If additional time is needed to complete the degree, the student must also petition the Undergraduate Academic Standards and Honors Committee for an extension. A student admitted for a second Bachelor of Science degree in a particular option may not change to another option without first submitting a new petition to the Curriculum Committee and receiving the explicit approval of that committee.

145

Graduation with Honor

Students who have achieved a high scholastic standing or who have carried out creative research of high quality may be recommended to the faculty for graduation with honor by the Undergraduate Academic Standards and Honors Committee. The Committee shall consider for graduation with honor those students who have achieved an overall grade-point average of 3.5 and others who, on the basis of exceptional creativity, have been recommended to the Committee by a faculty member or by a division of the Institute.

Excess of or Fewer Than Normal Units (Overloads and Underloads)

An overload is defined as registration for more than 54 units by an upperclassman or more than 51 units by a freshman. An underload is registration for fewer than 36 units. A student who wishes to carry an overload in any term must obtain the approval of his or her adviser and of the dean or associate dean of students. Petitions for overloads will not be accepted later than the last day for adding classes in any term.

Underloads for freshmen, sophomores, and juniors must be approved by the dean or associate dean. Seniors may take an underload by presenting for the registrar's approval a senior underload petition and a course plan for graduation the following June, provided that the plan does not require an overload in any term.

Allowance and Transfer of Credit

Transfer of Credit from Other Institutions

Regularly enrolled students who want to obtain credit for college courses taken elsewhere should have a copy of the transcript of their work sent to the Registrar's Office. The student should then obtain an Allowance of Credit form from the Registrar's Office and take this, with the transcript, to the representative of the option in which credit is desired. Credit will be granted when this form, with the appropriate signatures, is returned to the office.

Allowance of Credit in the Humanities and Social Sciences

In general, Caltech students should fulfill Caltech course requirements by taking courses at Caltech. Students are expected to have a well-reasoned educational goal for taking classes elsewhere. The only exceptions are transfer students admitted to advanced standing. Credit for comparable work done at other institutions with similar academic standards is not granted automatically.

Students who wish to take courses elsewhere (whether on leave, in the summer, or during the academic year) should consult, *in advance*, with the executive officer for the humanities or the executive officer for the social sciences, or their designees, to minimize any misunderstanding regarding the nature of credit they may receive. Upon completion of the course, the student must obtain an Allowance of Credit form from the registrar, obtain the signed approval of the executive officer, or his or her designee, for transfer credit, and return the completed form to the Registrar's Office. The executive officers are the final authority in the allowance of credit.

Guidelines and specific information about allowance of credit are available from the Division of the Humanities and Social Sciences.

Other Allowances of Credit

Except for transfer credit and credit based on Caltech placement exams upon admission, credit will not be granted for Caltech courses in which the student is not officially enrolled, except in special circumstances by arrangement with the instructor. Such arrangements must be approved by the Curriculum Committee, and the student must petition the Committee before the work is undertaken.

UNDERGRADUATE EXPENSES

For freshman and transfer students applying for admission, there is a \$60 application fee. This fee is nonrefundable.

Housing contracts must be submitted to the senior director of campus life by the date specified in the instructions accompanying the contract.

Undergraduate Information

Expense Summary 2008-09

General:

General Deposit	\$ 100.00 ¹
Orientation Fee	500.00 ¹
Tuition	31,437.00
	<u>\$ 32,037.00</u>

¹ This charge is made only once during residence at the Institute.

Other:

Student Fees	
Freshmen, Sophomores, & Juniors	\$ 3,000.00
Seniors	1,080.00
Room (contract price)	5,733.00
Board (5 days/week)	4,413.00
Additional Meal Allowance (est.)	1,332.00
Books and Supplies (est.)	1,194.00
Personal Expenses (est.)	1,881.00

The tuition and fees charge for all students is payable in three installments at the beginning of each term. Fees are subject to change at the discretion of the Institute.

Tuition fees for fewer than normal number of units:

36 units or more	<i>Full Tuition</i>
Per unit per term	\$ 291.00
Minimum tuition per term	2,910.00
Contact Bursar's Office for audit fee.	

Refunds and Fees

Refunds and Repayments

For all students, the institutional charges, e.g., tuition and room and board, will be prorated according to the amount of time the student spent in academic attendance before withdrawing. These prorated charges will be compared to the payments received on behalf of the student, and the Institute will determine whether the student is entitled to a refund or owes additional funds to Caltech.

For students receiving funds from federal Title IV, from Caltech, and/or from state programs, the Institute will follow federal and other applicable regulations to determine the amount of all program funds the student has earned at the time of withdrawal. In general, the amount of financial aid earned is based on the amount of time the student has spent in academic attendance. If the amount of aid disbursed to the student is greater than the amount the student has earned, unearned funds must be returned. If the amount the student was disbursed is less than the amount the

student earned, the student will be eligible to receive a postwithdrawal disbursement.

The Department of Education has provided a summary of these regulations in *The Student Guide* for the 2008–09 award year, available online at http://studentaid.ed.gov/students/publications/student_guide/index.html.

Determining the Student's Last Date of Attendance or Withdrawal Date:

The Office of the Registrar is responsible for obtaining requests for withdrawal from the undergraduate or graduate dean and for processing official withdrawals. In order to calculate the refund or repayment, Caltech will establish the student's withdrawal date. This date is one of the following:

- the date that the student began the withdrawal process prescribed by Caltech;
- the date the student otherwise provided official notification to the registrar (written or oral) of his or her intent to withdraw;
- the midpoint of the academic term if no official notification is provided;
- the date determined by the registrar if there are special circumstances (illness, accident, grievous personal loss); or
- the date the registrar determines the student has not returned from an approved student sabbatical or if the student does not qualify for a sabbatical.

Academically Related Activities That Determine Academic Attendance:

The Institute may use the last date of attendance at an academically related activity as the student's withdrawal date. This may occur if a student begins the withdrawal process and then attends an academically related activity after that date. Caltech considers an academically related activity to include the following:

- attendance at a lab
- attendance at a lecture
- completing a quiz and/or test
- participation in a study session
- academic counseling session
- academic advisement session
- turning in a class assignment

Determining the Return of Federal Funds: The Financial Aid Office and/or the Graduate Office will calculate the federal funds that must be returned to the appropriate federal accounts.

If a student withdraws prior to the first day of classes for the period of enrollment, Caltech will return 100 percent of the student's federal financial aid in accordance with federal procedures, as well as Caltech and/or state grants or aid.

If a student withdraws any time after the first day of classes for the period of enrollment, the Institute will perform the following:

- Determine the percentage of the payment period that the student completed. If the student completed more than 60 percent of the period, he or she earned 100 percent of the aid for the period. If the student completed 60 percent or less, the percentage of the period completed is the percentage of aid earned. This percentage is determined by dividing the number of days attended in the period of enrollment by the total days in the period.
- Apply the earned percentage to the amount of aid actually disbursed and the amount that could have been disbursed ("earned aid").
- Subtract earned aid from aid that was actually disbursed. This results in the amount of unearned aid to be returned.

The Financial Aid Office and/or the Graduate Office (as appropriate) will allocate the return of funds back to the student aid programs in the following order:

1. Federal Direct Unsubsidized Stafford Loan Program
2. Federal Direct Subsidized Stafford Loan Program
3. Federal Perkins Loan Program
4. Federal Direct PLUS Loan Program
5. Federal Pell Grant Program
6. Federal SEOG Program
7. Other Title IV Programs

Any remaining refund will be returned to the other state, institutional, or private student assistance utilized. Federal Work Study is not included in any of these calculations.

Appeals on Refunds: Any questions or problems related to refunds should be directed to the Bursar's Office. For further information on refunds and repayments, contact the Financial Aid Office, the Graduate Office, or the Bursar's Office.

Dropping a Course: A student's financial-aid package will be adjusted to reflect any tuition adjustment made by the Bursar's Office as well as any other adjustments required by law or by the applicable fund donor(s). In addition, students who are not enrolled full time as of the last day to add courses will have their aid revised. Generally, students enrolling less than three-fourths time will have an increased work award. Additional information is available in the Financial Aid Office.

Refund upon Withdrawal: When a student, for whatever reason, withdraws from Caltech during an academic term, a refund of tuition as well as room and board, if applicable, is calculated. The amount of refund is determined by how much of the term has elapsed. If the student is a recipient of student financial assistance, that assistance, if applicable, will be reduced as a result of his or her withdrawal. Recent federal legislation determines the amount of refund for recipients of federal Title IV student assistance. It is

the purpose of this section to inform students of the financial implications of withdrawal.

If the student is not a recipient of federal financial aid, the Institute's refund policy returns any refund of tuition or room and board first to the programs from which assistance has been received (i.e., scholarships, Caltech gift assistance). Any amount remaining will then be returned to the student. The non-Title IV portion will be distributed as appropriate, first to outside agencies, as required, then to the Caltech grant, scholarship, or loan, depending on the composition of the aid package. These distributions will occur as credits to the appropriate aid funds and charge(s) to the student's Caltech account.

If the student is the recipient of federal Title IV student assistance, any refund must then be applied first to the federal aid program(s) in the prescribed order listed on page 149.

In the event that a student's disbursed financial aid exceeds the direct costs on the student's personal account, a credit balance will result. Withdrawal will result in the reversal or repayment of the resulting credit balance.

150

General Deposit

Each new student is required at his or her first registration to make a general deposit of \$100, to cover possible loss and/or damage of Institute property. Upon graduation or withdrawal from the Institute, any remaining balance of the deposit will be refunded.

Fees for Late Registration

Registration is not complete until the student has enrolled in a program approved by his or her adviser and has paid tuition and other fees. A penalty fee of \$50 is assessed for failure to register within five days of the scheduled dates. A \$50 late penalty will be charged by the Bursar's Office for failure to clear a past-due account within five days of the beginning of instruction.

Honor System Matters

Monies owed to the Institute resulting from a Board of Control decision may be collected through the Bursar's Office, at the request of the dean of students.

Special Fees

Students taking the Summer Field Geology course (Ge 120) should consult with the division about travel and subsistence arrangements and costs.

Unpaid Bills

All bills owed the Institute must be paid when due. Any student whose bills are past due may be refused registration for the term following that in which the past due charges were incurred.

Transcripts will not be released until all bills have been paid or satisfactory arrangements for payment have been made with the Bursar's Office.

FINANCIAL AID

Caltech believes that qualified students who wish to attend the Institute should not be prevented from doing so for financial reasons. Although the Institute expects students and families to finance the cost of education to the fullest extent possible, the Institute will make every effort to assist those who need help, including those whose financial circumstances change during the year.

Demonstrated financial need is the difference between the annual cost of attending Caltech and the amount the student and parents can reasonably be expected to contribute toward those costs. Costs include actual tuition, student fees, room and board, an allowance for meals not covered in the board contract, books and supplies, and personal expenses. For U.S. citizens or eligible noncitizens who reside in the United States, Canada, Mexico, or Guam, costs include a travel allowance designed to (partially) offset the cost of two round-trips from a student's home during the academic year, and a travel allowance based on airfare for two round-trips. Caltech's estimate of a family's ability to contribute is determined annually in accordance with nationally established guidelines.

Eligibility for each type of assistance varies, depending upon the source of funds. Assistance offered by Caltech includes federal, state, and institutional grants, subsidized part-time jobs, and low-interest loans. U.S. citizens or eligible noncitizens (as defined in the Free Application for Federal Student Aid [FAFSA]) may apply for state and federally funded programs. International students may apply for institutionally funded programs.

Students should not wait to be accepted for admission to Caltech before applying for financial aid. With the exception of international students, applications for admission are evaluated separately from requests for financial aid. Students with complete financial-aid applications on file will be considered for all applicable types of need-based assistance. A renewal application must be submitted each year. In addition to direct financial assistance, information is available, upon request, about education payment plans and financial-planning resources. (For information on non-need-based scholarships and prizes, see pages 155–156, 166–175.)

All students who believe they will need assistance to attend Caltech are encouraged to submit financial-aid applications.

151

The Financial Aid staff is happy to talk with students and their families at any time to explain the application process, Caltech's computations, and available programs. For further information on the determination of financial need and on application procedures, as well as on financial-aid awards and programs, contact the Financial Aid Office, California Institute of Technology, Mail Code 110-87, Pasadena, CA 91125, call (626) 395-6280, or visit the Caltech Financial Aid Office website at <http://www.finaid.caltech.edu>.

How to Apply for Financial Aid

Slightly different procedures and deadlines exist for each category of students applying for financial aid. Detailed descriptions of these procedures and deadline dates for prospective and continuing students may be found on the Caltech Financial Aid Office website at <http://www.finaid.caltech.edu>.

Application Process for Caltech and Federal Financial Aid for Entering Students (U.S. citizens and eligible noncitizens)

The following materials are needed to apply for all financial-aid funds administered by the Caltech Financial Aid Office. We realize that you may not have access to your completed 2008 federal income-tax information by this time and ask that you complete the application based on the best estimates available.

CSS/Financial-Aid PROFILE Application:

Register for the 2009–10 CSS/Financial Aid PROFILE after October 1, 2008. Designate “California Institute of Technology” as one of the recipients by using Caltech’s CSS Code 4034. Due Dates: December 15, 2008: Applicants must register for the CSS/Financial-Aid PROFILE. January 15, 2009: Regular-action applicants must submit the completed PROFILE application. Note: Early-Action applicants must register for the CSS/Financial-Aid PROFILE by October 15, 2008, and must submit the completed PROFILE application by November 15, 2008.

Free Application for Federal Student Aid (FAFSA):

The 2009–10 FAFSA will be available on January 1, 2009, at www.fafsa.ed.gov. File the FAFSA and designate “California Institute of Technology” as the recipient by using Caltech’s Undergraduate Federal Code Number 001131. Due date: January 15, 2009.

Parents’ and Students’ Federal Income-Tax Return:

Parents and students must submit 2008 Federal Income-Tax Returns (including all schedules and W-2s). Applicants will need to provide a copy of their parents’ most recent tax return before eligibility for financial aid can be determined. Applicants will be sent an e-mail from the College Board with instructions on how to submit

their tax returns using the Institutional Documentation Service (IDOC). Log in to the IDOC site at <https://idoc.collegeboard.com/idoc/index.jsp>, download and complete the IDOC cover sheet, and submit your 2008 federal income-tax return, all schedules, all W-2 forms, and all other required documents directly to the College Board. If you or your parents own corporations, partnerships, or trusts, please include copies of those tax returns (Forms 1041, 1065, 1120, 1120S, K-1). All copies need to be sent directly to the College Board along with your IDOC cover sheet. Due date: March 2, 2009.

Verification Worksheet: All students and parents must complete and sign the 2009–10 Verification Worksheet, available at www.finaid.caltech.edu/forms. Use the IDOC cover sheet to submit the appropriate worksheet directly to the College Board. Due date: March 2, 2009.

Caltech Supplemental Application: All students must complete the 2009–10 Caltech Supplemental Application, available at www.finaid.caltech.edu/forms. Use the IDOC cover sheet to submit this form directly to the College Board. Due date: March 2, 2009.

CSS Noncustodial PROFILE Application: If your parents are divorced, separated, or never married, your noncustodial parent will need to complete the 2009–10 CSS Noncustodial PROFILE Application. After your CSS PROFILE application is processed, you will receive an e-mail from the College Board with instructions on how to submit this information. Once you have your login information your noncustodial parent can access the application at <https://ncprofile.collegeboard.com/ncpWeb/pageflows/Main/NcpMainController.jspf>. Due date: March 2, 2009.

CSS Business/Farm Supplement: If either of your parents is self-employed or owns a business or farm, you will need to submit the 2009–10 CSS Business/Farm Supplement, available at www.finaid.caltech.edu/uploads/File/0910BusFarm.pdf. You will receive an e-mail from the College Board with instructions on how to submit this form and other required tax documents using the Institutional Documentation Service (IDOC). Log in to the IDOC site to get your IDOC cover sheet. Use the IDOC cover sheet to submit this form and all other required documents directly to the College Board. Due date: March 2, 2009.

Caltech Scholarship Data Form: Complete the 2009–10 Caltech Scholarship Data Form to be considered for named and endowed scholarships. Entering students will not be issued a Caltech ID number—required for the form—until sometime in June 2009. Due date: July 15, 2009.

International Applicants

Follow the directions below if you are applying for admission as a freshman for the fall of 2009 and are not a citizen or permanent resident of the United States at the time of your application for admission. The forms indicated below are required in order to apply for all need-based funds administered by the Caltech Financial Aid Office. International applicants who do not apply for financial aid by published deadlines, or who are denied aid for their first year at Caltech, are not eligible for need-based financial aid for any other academic period while they are undergraduates at the Institute (with the exception of citizens of Canada and Mexico). Those with financial-aid offers will be eligible to apply for assistance in subsequent years. All eligible students must reapply for aid each year.

The Caltech Financial Aid Office receives a large volume of materials from students and their families. It is important that you clearly write the student name and birth date on the top of all materials you submit. We suggest that you keep copies of all application materials and obtain a Certification of Mailing from your post office.

154

International Student Financial-Aid Application: Complete the 2009–10 International Student Financial-Aid Application, available at www.finaid.caltech.edu/uploads/File/0910IntlApp.pdf, and mail it directly to Financial Aid Office, MC 110-87, California Institute of Technology, Pasadena, CA 91125. Due date: January 15, 2009.

Parents' National Income-Tax Return: Submit a signed copy of your parents' 2008 national income-tax statement, including all supporting schedules. In the absence of your parents' current tax return, certified documents from employers that verify your parents' annual earnings will be accepted. All income documents must be translated into English. Please mail directly to the Caltech Financial Aid Office. Due date: March 2, 2009.

Student's National Income-Tax Return or Certification of Nonfiling: Submit a signed copy of your 2007 national income-tax statement. If you did not or will not file a national income tax statement, please complete the Student Certification of Nonfiling form available at www.finaid.caltech.edu/uploads/File/0910SCNF.pdf. All documents must be translated into English. If you submitted a 2008 Federal Income-Tax Form, be sure to submit a signed copy, along with all schedules, attachments, W-2s, and 1099 forms. Please mail directly to the Caltech Financial Aid Office. Due date: March 2, 2009.

Caltech Scholarship Data Form: Complete the 2009–10 Caltech Scholarship Data Form to be considered for named and endowed scholarships. Entering students will not be issued a Caltech ID number—required for the form—until sometime in June 2009. Due date: July 15, 2009.

Types of Aid Available

There are three basic categories of financial aid that may be awarded.

1. Grants and scholarships represent “gift aid,” which does not need to be repaid. In general, a Caltech Scholarship is awarded based on financial need. Caltech named and/or endowed scholarships are considered to be based on need and merit, with the exception of the Lingle, Axline, and President's Scholarships, which are based only on merit. If you qualify for a state or federal grant, this grant would be included in your financial-aid package.
2. Federal Work-Study or Caltech Work-Study represents student employment funds that have been allocated for you to earn during the academic year. Summer Caltech Work-Study represents funds that have been allocated for you to earn during the summer. While a work-study award is not a guarantee of employment, Caltech generally has more opportunities for student employment than we have students interested in working.
3. Low-interest educational loans: Students are generally offered Federal Perkins Loans or Caltech/Institute Loans. Students may be awarded Federal Direct Stafford Loans if they request them.

155

Caltech Scholarships

Need-Based Caltech Scholarships

Awarded to students with demonstrated financial need. Recipients are expected to be enrolled full time. Caltech scholarships are awarded based on need. The named and/or endowed scholarships are also need-based but many have a merit component. Recipients of named and/or endowed scholarships are often selected after their initial financial-aid offer based on scholarship-specific eligibility. These scholarships are almost always used to replace some or all of the recipient's Caltech scholarship. The Financial Aid Office makes every attempt to renew these scholarships, contingent upon the recipients continuing to meet the specific eligibility criteria.

Caltech Merit Scholarships

The Freshman Admissions Committee selects a limited number of admitted freshmen in each entering class to receive Lingle, Axline, or President's Scholarships. Selection for these merit awards is based on the overall strength of the prospective freshman's application for admission. Renewal is contingent upon the recipients' academic performance at Caltech.

Several named scholarships are awarded to returning undergraduates by the Faculty Committee on Scholarships and Financial Aid through the annual Upper Class Merit competition. Recipients are recommended by the committee based on their review of the

students' Upper Class Merit applications, including faculty recommendations. Awards are not renewable. These awards are given to approximately 50 of Caltech's most academically talented sophomores, juniors, and seniors, and the honor is recorded on academic transcripts and listed in the commencement program when the recipients graduate.

Federal Grants

Federal Pell Grant

Awarded to exceptionally needy undergraduate students who are seeking their first bachelor's degree. Amounts are set by the federal government based on need and enrollment status. In 2008–09, awards ranged from \$890 to \$4,731 for full-time students; awards for part-time students are set in proportion to their enrollment, i.e., three-quarter time, half-time, less than half-time. Recipients must be in good academic standing.

Academic Competitiveness Grant

Awards \$750 for the first year of undergraduate study and \$1,300 for the second year of undergraduate study to students who are enrolled full-time, are receiving a Federal Pell Grant, are U.S. citizens, and have completed a rigorous high-school program as determined by the state or local education agency and the U.S. secretary of education. (For the published list of rigorous programs of study, go to <http://www.ed.gov/admins/finaid/about/ac-smart/state-programs.html>). Second-year students must have maintained a cumulative grade point average of at least 3.0 on a 4.0 scale.

National SMART Grant

Awards \$4,000 for the third and fourth years of undergraduate study to students who are enrolled full-time, are receiving a Federal Pell Grant, are U.S. citizens, and have a cumulative grade point average of at least 3.0 on a 4.0 scale in the courses for their program (not only those in the major); and are majoring in physical, life, or computer science, engineering, mathematics, technology, or a critical foreign language.

Federal Supplemental Educational Opportunity Grant

Awarded to undergraduates with demonstrated need who are seeking their first bachelor's degree. Priority goes to full-time Pell Grant recipients. Recipients must be in good academic standing. Awards cannot exceed \$4,000 per year.

State Grants

Cal Grant A

Provides tuition and fee assistance to undergraduate California residents seeking their first bachelor's degree. Awarded on the basis of cumulative grade point average and financial need. Qualifying

students can receive up to \$9,708, renewable for up to four years. Continuing Cal Grant recipients must maintain good academic standing in addition to financial need. They are not required to resubmit verification of their grade point averages for renewal.

Cal Grant B

Provides a living-allowance stipend and tuition/fee assistance to undergraduate California residents seeking their first bachelor's degree. Awards are based on cumulative grade point average and high financial need. Recipients are generally from disadvantaged economic or educational backgrounds. Awards for first-year students provide up to \$1,551 for books and living expenses. When renewed or applied beyond the first year, awards also include tuition and fee assistance of up to \$9,708. Continuing Cal Grant recipients must maintain good academic standing in addition to financial need. They are not required to resubmit verification of their grade point averages for renewal.

Other State Grants

Other states such as Pennsylvania, Vermont, and Rhode Island may offer grant assistance to their residents who plan to attend Caltech. Students are encouraged to contact their respective state post-secondary agencies for specific eligibility and renewal criteria.

Educational Loans

An educational loan is a serious financial obligation and must be repaid. You should carefully consider the repayment obligation before you accept educational loans. Loans can be an invaluable resource for many students and their families in financing a college education. Students can postpone paying a portion of their educational costs until they complete their education or leave school. The repayment period on most loans can extend up to 10 years after graduation or leaving school.

Graduating with educational debt is a fairly common experience for students. At Caltech, however, the average educational indebtedness at graduation is significantly lower than the national average for students attending four-year private and public colleges. Over the last several years, the average for Caltech graduates has been among the lowest in the nation for four-year colleges.

Federal Perkins Loans

Awarded to students based on financial need. The maximum amount an eligible student may borrow is \$4,000 per award year if he or she has not successfully completed a program of undergraduate education (\$6,000 per year for graduate students). The maximum aggregate amount that may be borrowed is \$8,000 for any student who has not yet completed two years of undergraduate work; \$20,000 for an undergraduate student who has completed

two years of undergraduate work and is pursuing an undergraduate degree; and \$40,000 for a graduate student, including loans borrowed as an undergraduate. The aggregate loan limits include only the unpaid principle.

Perkins Loans carry an annual interest rate of 5 percent. Interest does not accrue while the borrower is enrolled in school at least half-time, during the grace period (the time before which the borrower must begin or resume repaying a loan), or during authorized deferments. The borrower is responsible for paying the interest that accrues on the loan during repayment or forbearance (a temporary postponement of payments). Loans are repayable over a period of up to 10 years and have a nine-month initial grace period. Your monthly payment amount will depend on the size of your debt and the length of your repayment period. The minimum monthly payment is \$40.

The William D. Ford Federal Direct Loan Program

This program offers eligible students and parents the opportunity to borrow money directly from the federal government to help pay the cost of attendance at Caltech. The U.S. Department of Education makes loans, through Caltech, directly to students and/or parents. The Institute will use the loan(s) to pay your tuition/fees and other direct charges such as room and board, and give the student any remaining money for indirect costs. Students and/or parents make their repayments directly to the federal government.

Direct Loans include

1. The Federal Direct Stafford Loan Program;
2. The Federal Direct Parent PLUS Loan Program;
3. The Federal Direct Graduate PLUS Loan Program; and
4. The Federal Direct Consolidation Loan Program.

Federal Direct Stafford Loan

There are two types of Federal Direct Stafford Loans: subsidized and unsubsidized. The federal government pays the interest on subsidized loans while the borrower is enrolled at least half-time and during authorized periods of deferment. The interest on unsubsidized loans begins to accrue immediately upon disbursement and is generally capitalized (added to the amount borrowed) when the borrower is no longer enrolled at least half-time.

Eligibility for subsidized Stafford Loans is based on financial need as demonstrated by the FAFSA. Students who do not demonstrate sufficient need or whose need is met may borrow unsubsidized Stafford Loans provided their total financial aid, including the Stafford Loan, does not exceed the total estimated cost of attendance.

Under this federal loan program, dependent and independent undergraduate students may borrow combined subsidized and unsubsidized amounts not to exceed an annual total of

- \$3,500 for first-year students;
- \$4,500 for second-year students; and
- \$5,500 for third- and fourth-year students.

Graduate students may borrow up to \$8,500 per year, whether subsidized, unsubsidized, or a combination of both.

Independent undergraduate students and dependent undergraduate students whose parents are unable to borrow PLUS loans may borrow additional unsubsidized Stafford loan amounts not to exceed an annual total of

- \$4,000 for first- and second-year students; and
- \$5,000 for third- and fourth-year students.

The additional unsubsidized loan amount maximum for graduate students is \$12,000 per academic year.

The maximum outstanding total subsidized and unsubsidized Stafford loan debt is

- \$23,000 for dependent undergraduate students.
- \$46,000 for independent undergraduate students (or for dependent undergraduate students whose parents do not qualify for PLUS loans). No more than \$23,000 of this aggregate amount may be in the form of subsidized loans.
- \$138,000 for graduate students (including loans for undergraduate study). No more than \$65,000 of this aggregate amount may be in the form of subsidized loans.

The interest rate on Stafford loans disbursed for enrollment periods that began after July 1, 2006, is fixed at 6.8 percent. The interest rate for loans disbursed for enrollment periods that began before July 1, 2006, is variable and will be adjusted each year on July 1, though it will never exceed 8.25 percent. Borrowers pay a loan fee of up to 4 percent of the principal amount of each Stafford loan that they borrow. The maximum repayment period under this program is 10 years, not including authorized periods of deferment. Direct Stafford loans have a six-month grace period that starts the day after the borrower graduates, leaves school, or drops below half-time enrollment. Repayment begins when the grace period ends. Deferments are available for new borrowers during at least half-time enrollment at an eligible institution; during periods of study in approved graduate fellowship or rehabilitation programs; and for periods of unemployment and economic hardship.

Applications for Federal Direct Stafford loans are available from the Caltech Financial Aid Office. Complete information on Stafford loan deferments and repayment options is also available from the Financial Aid Office.

Federal Parent PLUS Loan

Parent PLUS loans are available to the parents or stepparents of dependent undergraduate students. These credit-based loans are not based on federal need or subsidized by the government but students must file a FAFSA in order for their parents to qualify for a Parent PLUS loan. The interest rate on Parent PLUS loans disbursed for enrollment periods that began after July 1, 2006, is fixed at 7.9 percent. Interest is charged on Direct Parent PLUS loans during all periods, beginning on the date of the loan's first disbursement. There is no annual limit to the amount that can be borrowed through the Parent PLUS loan program. In general, parents may borrow the difference between the cost of the student's education and any other financial aid received. PLUS loans may also be used to pay for all or part of the expected family contribution. In addition to the interest, parents pay a loan fee of 4 percent of the principal amount of each Direct Parent PLUS loan received. The maximum repayment period under this program is 10 years (not including authorized periods of deferment). Repayment of the principal and interest on a Parent PLUS begins within 60 days after the loan is fully disbursed.

Applications for Federal Direct Parent PLUS loans are available from the Caltech Financial Aid Office. Applications must be submitted to the Financial Aid Office for eligibility certification. Complete information on Parent PLUS loan deferments and repayment options is also available from the Financial Aid Office.

Federal Student Aid Ombudsman

The Federal Student Aid Ombudsman works with student loan borrowers to informally resolve loan disputes and problems. The office of the ombudsman helps borrowers having problems with the following federal loans: Direct loans (subsidized and unsubsidized Direct Stafford loans, Direct PLUS loans, and Direct Consolidation loans); Federal Family Education loans (subsidized and unsubsidized Stafford loans, FFEL PLUS loans, and FFEL Consolidation loans); guaranteed student loans, SLS loans, and Federal Perkins loans. If a student needs the assistance of the ombudsman in order to resolve disputes or problems, he or she may contact the office at U.S. Department of Education, FSA Ombudsman, 830 First St., NE, Washington, D.C., 20202-5144; (202) 377-3800 or (877) 557-2575; fsaombudsmanoffice@ed.gov; or visit the website at <http://www.ombudsman.ed.gov>.

Caltech Loans

Awarded to students who are not eligible for or who may have used their eligibility for Federal Perkins Loans. Generally, no interest is charged and no repayment of principal is required while a student maintains a continuous course of study at Caltech. Like the Federal Perkins Loan program, repayment on Caltech Loans

begins nine months after graduation, leaving school, or less than half-time enrollment. Caltech Loans carry an annual interest rate of 5 percent. More specific information is provided on the promissory note and the disclosure statement provided to students prior to disbursement of the loan.

Cecil L. Kilgore Student Loans are available to members of all undergraduate classes, including freshmen, under the same general guidelines established for Caltech Loans as described above. It is the fund's policy to make loans available at the lowest possible cost to the student, with priority given to students in the field of power engineering.

Other Loans/Emergency Loans may be available to students regardless of their eligibility for financial aid. *The Hoover Loan Fund* enables students to borrow small sums of money to cover unforeseen emergencies. These loans are usually payable within the same academic year and are administered by the dean of students on a case-by-case basis. Additional information and applications may be obtained from the Dean of Students Office.

The Caltech Y also has a no-interest, 30-day, emergency-loan program. Maximum loans are \$50. Additional information and applications may be obtained from the Caltech Y.

Alternative Loans and Payment Options

Several private organizations offer a variety of financing options (such as long-term loans and monthly payment plans) to assist students and families in meeting college expenses. Information describing these programs is available upon request from the Caltech Financial Aid Office and on the Caltech Financial Aid website at <http://www.finaid.caltech.edu>.

Student Employment

Student employment programs provide more than just the opportunity to earn money to help meet your Caltech expenses. They provide students with an important opportunity, which they might not otherwise have, to connect with the Institute, and they allow students to gain valuable job experience that might be helpful in the competitive postcollege job market.

Student employment opportunities are generally available to all Caltech students, even those who have not applied for financial aid or qualified for need-based aid. Caltech students should not hesitate to contact the Caltech Career Development Center for assistance in finding part-time employment either on or off campus.

Student employees are paid at least the federal minimum wage. Compensation rates will vary based on the position, a student's job skills and previous work experience. Undergraduate students can earn from \$8 to just over \$32 per hour.

Federal Work-Study

Awarded to domestic students who have demonstrated financial need through their submission of the FAFSA, this federally funded program provides part-time employment to eligible students.

Most Caltech students are awarded \$2,000 in Federal Work-Study (FWS). Some students are awarded less. The maximum amount of FWS wages that a student may earn is determined by their financial need. As stated above, students have the option to move all or a portion of their loan or student employment from one program to the other at any time during the academic year until the month prior to the end of the regular academic year.

Students can find open student employment positions by contacting the Caltech Career Development Center or the Caltech Y and by checking the student newspaper, the *California Tech*, as well as bulletin boards around the campus. FWS positions are available on campus and at the Jet Propulsion Laboratory, and community service opportunities are available through the Caltech Y. We encourage FWS recipients to look into community-service jobs.

Caltech Work-Study

The Caltech Work-Study Program is funded by the Institute and is designed to provide part-time employment for international students who have demonstrated financial need as well as other students who do not qualify for the Federal Work-Study Program. The Caltech Work-Study program is limited to on-campus employment or student employment positions at the Jet Propulsion Laboratory. The program's regulations parallel the Federal Work-Study Program's regulations.

Please note that entering freshmen are not permitted to work during the fall term and must receive permission from the dean of students to work during the winter and/or spring terms. In practice, students are generally given permission to work unless they've experienced academic difficulty in the preceding term and the Dean of Students Office determines that work would interfere with a student's academic progress.

Summer Federal Work-Study and Summer Caltech Work-Study

These two programs enable returning Caltech undergraduates who demonstrate financial need to earn a portion of their expected self-help during the summer. A separate application, available in the Financial Aid Office, is required to apply for summer work-study and must be submitted by June 1.

Financial Aid When Studying Abroad

Caltech provides student financial aid (in the form of grants, scholarships, and loans) to those undergraduates with demonstrated financial need who desire to participate in the Institute-sponsored Caltech Cambridge Scholars Program, Caltech Copenhagen

Scholars Program, Caltech Edinburgh Scholars Program, or Caltech London Scholars Program.

Enrollment in a study-abroad program approved for credit by Caltech will be considered enrollment at the Institute, for the purpose of applying for and receiving federal student financial assistance. To be eligible for consideration in Caltech's study-abroad programs, students must be in good academic standing, as defined in the *Caltech Catalog* and as certified by the Institute's registrar. They must also meet the minimum GPA requirement as outlined in the information provided by the Fellowships Advising and Study Abroad Office. In addition, students selected to be Cambridge, Copenhagen, or University College London Scholars will be provided a memo of understanding outlining the terms of their study-abroad participation. (For more information on study abroad, see page 134.)

Costs include but are not limited to tuition, fees, room, board, additional meals not covered by a board contract, books, supplies, personal expenses, and a standard transportation allowance from the student's home to Caltech. Transportation expenses related to the student's travel between Caltech and the study-abroad institution are the responsibility of the student; financial-aid recipients may be offered interest-free Institute Loans to cover study-abroad travel expenses. Students will have their expected family contribution and financial package calculated in the same manner as other students. Students studying abroad are subject to the standard Caltech policy of a maximum of 12 terms of eligibility for financial aid. Cambridge, Copenhagen, University College London, and University of Edinburgh Scholars candidates must meet all financial-aid priority deadlines and eligibility requirements to receive aid. It is the student's responsibility to ensure that all necessary documents are filed and complete with regard to their application for financial aid. Cambridge, Copenhagen, University College London, and University of Edinburgh Scholars will continue to be considered for available federal, state, and Caltech grant, scholarship, and loan funds. The Fellowships Advising and Study Abroad Office will make the necessary arrangements with the Bursar's Office to ensure that scholars who may be eligible for funds in excess of the direct charges to the Institute receive those funds prior to their departure.

Other Resources

A number of both local and national organizations offer outside scholarships to continuing students throughout the year, some of these regardless of need. The student newspaper, the *California Tech*, announces eligibility criteria for several such scholarships. Those relevant to undergraduate students will also be posted in the Scholarship News section of the Caltech Financial Aid Office website. Such scholarships can also often be found with the help of a search service. We recommend FastWeb (www.fastweb.com);

BrokeScholar (www.brokescholar.com); and College Answer (www.collegeanswer.com). (For more information on scholarship services, go to <http://www.finaid.org>.)

Outside scholarships acquired by students are considered, by federal regulation, to be a resource available during the academic year. Caltech's policy is to use outside scholarships to replace the student employment and/or loan components of the financial-aid package. For entering students, we generally replace student employment first. For continuing students, loans are generally replaced first. Only if the total outside scholarships exceeds the student employment and/or loan that would have been included in your financial-aid package will it be necessary to reduce Caltech scholarship. In general, a student's total financial aid, including outside assistance, cannot exceed their demonstrated financial need. Under no circumstances can a student's total financial aid, including Caltech merit scholarships, exceed their estimated cost of attendance.

Financial-Aid Disbursement

Most financial-aid funds are credited directly to your student account and are applied first to institutional charges for the current term. Funds are credited no earlier than 10 days prior to the first day of the term. Aid that can be credited directly to your account will be credited when you have

- completed and returned your award letter;
- provided all required documents for the aid programs you have been awarded;
- made satisfactory academic progress;
- enrolled in at least the minimum number of credits for the financial-aid programs you have been awarded;
- completed all necessary loan documents and, for first-time Direct Stafford loan borrowers, completed the online Entrance Interview.

If the disbursement of your aid results in a credit balance, any aid awarded in excess of institutional charges will be paid to the student as a refund. Refunds must be requested by the account holder. Requests may be made by e-mail, telephone, or in person at the Bursar's Office. Prior to receiving funds, it may be necessary to fill out and sign a refund form. Refunds can be obtained in cash or by check. A maximum refund of \$500 cash per day can be received from the Bursar's Office cashier. Refund checks are requested by the Bursar's Office and issued by Accounts Payable. This usually takes five working days from the day of request.

Outside scholarships are usually disbursed in the form of a check and must be handled according to the sponsor's specifications. If the funds are sent to the Financial Aid Office or the Bursar's Office, they will be credited to your account. Again, if the crediting of any outside scholarship results in a credit balance on your account, you may request that the credit balance be refunded

to you. Federal regulations allow Caltech to credit financial-aid funds to your account for payment of tuition, fees, and room and board charges. You must give the Bursar's Office written authorization to keep a credit balance on your account from one term to the next term during the academic year. Federal guidelines prohibit keeping a credit balance from one academic year to the next. If you complete your financial-aid file late in the term, resulting in the late disbursement of your financial-aid funds, you may be subject to late fees assessed by the Bursar's Office.

Cal Grant B stipend payments will be credited to your tuition account unless you contact the Financial Aid Office in person within the first three weeks of the term to make alternate arrangements. Again, if the crediting of any financial aid results in a credit balance on your account, you may request that the credit balance be refunded to you.

In general, loans are disbursed in three installments, one at the beginning each term. For most Caltech students who are enrolled for the full academic year, this means that one-third of their loan(s) will be disbursed at the beginning of the fall term, another at the beginning of the winter term, and the final third at the beginning of the spring term. Students whose loan periods are for one term receive their entire disbursement at the beginning of that term. If you work through either the Federal Work-Study or the Caltech Work-Study program, you will be paid by check through the biweekly Caltech payroll system. Checks are normally distributed at your actual work site.

Since financial aid is generally awarded on the assumption of full-time enrollment, it is possible that some or all of your aid will need to be adjusted if your enrollment status results in a reduction in your tuition for a term. If you withdraw or drop below half-time enrollment after the last day for adding classes for a term, you may be required to repay all or a portion of the aid that has already been credited to your account. You must inform the Financial Aid Office if you take a leave of absence or change your enrollment subsequent to receiving your financial aid. Cal Grant recipients who take a leave of absence are advised to contact the California Student Aid Commission (www.csac.ca.gov) and submit a form to remain eligible for the program.

You have the right to cancel your loan(s) anytime before disbursement and up to 14 days after disbursement.

Satisfactory Academic Progress

In order to continue to receive financial aid at Caltech, students must maintain satisfactory academic progress toward completion of the baccalaureate degree as defined in the *Caltech Catalog*. Whenever this is not maintained, approval for reinstatement by the Undergraduate Academic Standards and Honors Committee, the registrar, or the dean of students (as described in the *Caltech*

Catalog) shall reestablish satisfactory progress for purposes of financial-aid eligibility. In general, assistance is available to eligible students for the first 12 terms of enrollment (or the equivalent for transfer or less than full-time students). Exceptions may be approved after submission of a petition to the Financial Aid Office. Petition forms are available in the Financial Aid Office.

Class Level

For financial-aid purposes, undergraduate students are classified according to the number of units earned and the number of terms in residence at Caltech. Both these criteria must be satisfied for class level eligibility. Students are regarded as freshmen until eligible for sophomore status, and as sophomores, juniors, or seniors if they meet the corresponding criteria set below. Units earned are defined as units completed with a passing grade.

<i>Classification</i>	<i>Minimum Units Earned</i>	<i>Minimum Terms in Residence</i>
Sophomore	108	3
Junior	216	6
Senior	324	9

Part-Time Enrollment (Underloads)

Underloads (undergraduate students taking less than 36 units in a term) must be approved by the registrar or the Undergraduate Academic Standards and Honors Committee. Students enrolled half-time (taking 18 to 26 units) will be expected to accept a reduction in the books and supplies allowance of their college expense budget. All students planning to carry an underload should contact the Financial Aid Office prior to taking less than a full-time course load.

PRIZES

Rosalind W. Alcott Merit Scholarship, Caltech Upperclass Merit Scholarships, Carnation Scholarships, and John Stauffer Merit Scholarship

Each year Caltech awards these prizes for academic excellence to continuing students. They are based solely on merit (selection is made on the basis of grades, faculty recommendations, and demonstrated research productivity) with no consideration given to need or any other nonacademic criterion.

Robert P. Balles Caltech Mathematics Scholars Award

An annual prize of \$1,000 is awarded to the mathematics major entering his or her senior year who has demonstrated the most outstanding performance in mathematics courses completed in the student's first three years at Caltech. The executive officer for mathematics, in consultation with the faculty, determines the recipient. The prize is made possible by a gift from Mr. Robert P. Balles.

Mabel Beckman Prize

The Mabel Beckman Prize is given in memory of Mrs. Beckman's many years of commitment to Caltech's educational and research programs. The prize is awarded to an undergraduate woman who, upon completion of her junior or senior year at Caltech, has achieved academic excellence and demonstrated outstanding leadership skills, a commitment to personal excellence, good character, and a strong interest in the Caltech community. This prize is given at commencement.

Eric Temple Bell Undergraduate Mathematics Research Prize

In 1963 the department of mathematics established an Undergraduate Mathematics Research Prize honoring the memory of Professor Eric Temple Bell, and his long and illustrious career as a research mathematician, teacher, author, and scholar. His writings on the lives and achievements of the great mathematicians continue to inspire many hundreds of students at Caltech and elsewhere.

A prize of \$500 is awarded annually to one or more juniors or seniors for outstanding original research in mathematics, the winners being selected by members of the mathematics faculty. The funds for this prize come from winnings accumulated over the years by Caltech undergraduate teams competing in the William Lowell Putnam Mathematics Contest, an annual nationwide competition.

Bhansali Prize in Computer Science

The Bhansali Prize was established in 2001 by Vineer Bhansali (B.S. '87, M.S. '87) in memory of his grandfather, Mag Raj Bhansali. The prize and honorarium are awarded to an undergraduate student for outstanding research in computer science in the current academic year. Awardees are selected by a committee of computer science faculty.

Marcella and Joel Bonsall Prize for Technical Writing

The Marcella and Joel Bonsall Prize for Technical Writing was established by the late Marcella Bonsall to encourage SURF students to develop excellent technical writing skills. Mentors may nominate their students' papers for consideration. A faculty committee recommends the winning papers. Five prizes can be awarded annually, a first prize of \$500; second prize, \$300; and three \$200 third prizes.

Richard G. Brewer Prize in Physics

The Richard G. Brewer Prize is awarded to the freshman with the most interesting solutions to the Physics 11 “hurdles,” in recognition of demonstrated outstanding intellectual promise and creativity at the very beginning of his or her Caltech education.

The award is a stipend that will support the student for the summer while he or she works on an independent Physics 11 project. This award is made possible by a gift from Dr. Richard G. Brewer, a Caltech alumnus who received his B.S. degree in chemistry in 1951.

Fritz B. Burns Prize in Geology

This prize is awarded to an undergraduate who has demonstrated both academic excellence and great promise of future contributions in the fields represented by the Division of Geological and Planetary Sciences.

Bonnie Cashin Prize for Imaginative Thinking

This \$5,000 prize, established in 1997 by Bonnie Cashin, is awarded each year to the entering freshman who has written the most imaginative essays in the Application for Freshman Admission. The Freshman Admissions Committee will nominate awardees to the vice provost, who will approve the selection. The award may be shared if there is more than one deserving student in a particular year.

Donald S. Clark Memorial Awards

From a fund contributed by the Caltech Alumni Association, annual awards of \$1,000 are made to two juniors in engineering options. The award recognizes service to the campus community and a grade point average equal to or greater than that required for graduation with honor. The awards honor the work of Professor Clark, class of 1929, both in the field of engineering and in his service to the Alumni Association.

Deans' Cup and Campus Life and Master's Award

Two or more awards, selected by the deans, the assistant vice president for campus life, and the master of student houses, respectively, are presented to undergraduates whose concern for their fellow students has been demonstrated by persistent efforts to improve the quality of undergraduate life and by effective communication with members of the faculty and administration.

Doris Everhart Service Award

The Doris Everhart Service Award is given annually to an undergraduate who has actively supported and willingly worked for organizations that enrich not only student life, but also the campus and/or community as a whole, and who has, in addition, exhibited care and concern for the welfare of students on a personal basis.

The award was made possible by Sally V. Ridge and was established to honor Doris Everhart.

Richard P. Feynman Prize in Theoretical Physics

This prize was established through gifts in memory of Richard P. Feynman and the senior class gift of the class of 1989. It is awarded annually to a senior student on the basis of excellence in theoretical physics. The prize consists of a cash award and a copy of the three-volume set *The Feynman Lectures on Physics*.

Haren Lee Fisher Memorial Award in Junior Physics

Mr. and Mrs. Colman Fisher established the Haren Lee Fisher Memorial Award in Junior Physics in memory of their son. The General Electric Foundation also contributed to the fund under the matching plan of their Corporate Alumnus Program. A prize of \$350 will be awarded annually to a junior physics major, who is selected by a physics faculty committee as demonstrating the greatest promise of future contributions to physics.

Henry Ford II Scholar Awards

Henry Ford II Scholar Awards are funded under an endowment provided by the Ford Motor Company Fund, a nonprofit organization supported primarily by contributions from the Ford Motor Company. Each award, up to \$5,000, will be made annually either to the engineering student with the best academic record at the end of the third year of undergraduate study, or to the engineering student with the best first-year record in the graduate program. The chair of the Division of Engineering and Applied Science names the recipient.

Jack E. Froeblich Memorial Award

The family and friends of the late Jack E. Froehlich, who did his undergraduate and graduate work at Caltech and was later the project manager for Explorer I for the Jet Propulsion Laboratory, established a prize fund that provides an award of \$1,000 to a junior in the upper 5 percent of his or her class who shows outstanding promise for a creative professional career. The student is selected by the deans and the Undergraduate Academic Standards and Honors Committee.

George W. and Bernice E. Green Memorial Prize

The George W. and Bernice E. Green Memorial Prize was established in 1963 with contributions given in memory of George W. Green, who for 15 years served on the staff of the Caltech business office and was vice president for business affairs from 1956 to 1962. The prize of \$1,200 is awarded annually to an undergraduate student in any class for original research, an original paper or essay, or other evidence of creative scholarship beyond the normal

requirements of specific courses. The student is selected by the deans and the Undergraduate Academic Standards and Honors Committee.

Lucy Guernsey Service Award

Awarded to one or two students who have provided exceptional service to the Caltech Y and/or the community, are involved with service projects, have demonstrated leadership in community and volunteer service efforts, and who exemplify a spirit of service. Established by the Caltech Y ExComm in honor of Lucy Guernsey, the Y's executive director from 1989 to 1991.

Arie J. Haagen-Smit Memorial Fund

The Arie J. Haagen-Smit Memorial Award was established in 1977 to honor the memory of the pioneering bioorganic chemist who discovered the chemical constituents of smog. Dr. Haagen-Smit was a member of the Caltech faculty for 40 years, and his family and friends have arranged for a prize of \$750 to be given at the end of the sophomore or junior year to a student in biology or chemistry who has shown academic promise and who has made recognized contributions to Caltech. The selection is made by a committee of representatives from the biology and chemistry divisions, and the deans.

Frederic W. Hinrichs, Jr., Memorial Award

The Board of Trustees of the California Institute of Technology established the Frederic W. Hinrichs, Jr., Memorial Award in memory of the man who served for more than 20 years as dean and professor at the Institute. In remembrance of his honor, courage, and kindness, the award bearing his name is made annually to the senior who throughout his or her undergraduate years at the Institute has made the greatest contribution to the student body and whose qualities of character, leadership, and responsibility have been outstanding. At the discretion of the deans, more than one award, or none, may be made in any year. This award is given at commencement.

Alexander P. and Adelaide F. Hixon Prize for Writing

The Hixon Prize for Writing was established in 2000 by Alexander P. and Adelaide F. Hixon. The prize will be awarded annually to an undergraduate student for the best composition in a freshman humanities course. The prize is administered by the writing center, and the winner will be chosen by a committee from the Humanities division, with preference given to the paper best illustrating the relationship between the humanities and science and/or engineering.

The George W. Housner Prize for Academic Excellence and Original Research

The George W. Housner prize is given annually to a senior in the upper 20 percent of his or her class who has demonstrated excellence in scholarship and in the preparation of an outstanding piece of original scientific research. The student is selected by the deans and the Undergraduate Academic Standards and Honors Committee. At the discretion of the dean, more than one award may be made in any year. The prize, presented at commencement, consists of a cash award and a certificate. This prize is made possible by a gift from George W. Housner, Carl F Braun Professor of Engineering, Emeritus.

Bibi Jentoft-Nilsen Memorial Award

Family and friends of Bibi Jentoft-Nilsen, class of 1989, have provided this award in her memory. The cash award of \$500 is for an upperclass student who exhibits outstanding qualities of leadership and who actively contributes to the quality of student life at Caltech.

Scott Russell Johnson Undergraduate Mathematics Prize

This prize of \$2000 is awarded to the best graduating mathematics major. The prize may be split between two students. In deciding on the winner, special consideration will be given to independent research done as a senior thesis or SURF project. The executive officer for mathematics, in consultation with the faculty, determines the recipient. The prize is made possible by a gift from Steve and Rosemary Johnson in memory of Scott Johnson, B.S. '83.

D. S. Kothari Prize in Physics

This prize was established in 1998 in memory of Dr. D. S. Kothari, who received his Ph.D. under Lord Rutherford in 1933, and subsequently made significant contributions in theoretical astrophysics and science education. The award of \$500 is given each year to a graduating senior in physics who has produced an outstanding research project during the past year.

Margie Lauritsen Leighton Prize

From a fund established by Dr. Fay Ajzenberg-Selove and Dr. Walter Selove, the departments of physics and astrophysics will annually award the Margie Lauritsen Leighton Prize to one or two undergraduate women who are majoring in physics or astrophysics, and who have demonstrated academic excellence. The prize consists of a cash award and will be made at the end of the sophomore year.

Harry Leiter Memorial Mechanical Engineering Prize

This prize shall be awarded to a candidate for the degree of Bachelor of Science in mechanical engineering who has demonstrated extraordinary creativity as judged by a faculty committee appointed each year by the executive officer for mechanical engineering. The prize consists of a citation and a cash award. This prize is made possible by a gift from Dr. Symme Leiter.

Mari Peterson Ligocki (B.S. '81) Memorial Fund

This award is made to one student who through his or her personal character has improved the quality of student life at Caltech. It recognizes the student who provides quiet support and kind encouragement to peers. This fund was established by Mr. José F. Helú Jr. (B.S. '79) to honor the memory of Mari Peterson Ligocki, who possessed these qualities. The award consists of dinner for two at the recipient's choice of a fine restaurant, and a grant toward any project or cause of the recipient's choosing. It may be seed money for a project in any field, whether science-related or not.

Dorothy B. and Harrison C. Lingle Scholarship

Each year, the Freshman Admissions Committee selects two incoming freshmen for an annual merit award. The combination of the Lingle Scholarship and any other financial assistance cannot exceed the recipients' estimated cost of attendance. The Lingle Scholarship is awarded in recognition of interest in a career in science or engineering, outstanding academic record, demonstrated fair-mindedness, good work ethic, and unquestioned integrity. The award is renewable for three years, regardless of financial need, contingent upon continuing high academic performance. Such performance is defined as not failing any courses and maintaining honors standing. All admitted freshman applicants will be considered. No special application is required.

Mary A. Earl McKinney Prize in Literature

The Mary A. Earl McKinney Prize in Literature was established in 1946 by Samuel P. McKinney, M.D., of Los Angeles. Its purpose is to promote proficiency in writing. The terms under which it is given are decided each year by the literature faculty. It may be awarded for essays submitted in connection with regular literature classes, or awarded on the basis of a special essay contest. The prize consists of cash awards amounting to \$750.

Galina D. Moller Memorial Fund for Women

The Galina D. Moller Memorial Fund was established to honor Dr. Galina Moller (M.S. '74, Ph.D. '80), an alumna who was keenly aware of the special challenges encountered by professional women. The fund provides support for activities related to study, research, or professional development of undergraduate women.

For example, the funds could help defray the cost of attending a conference or seminar. The deans will allocate the funds as appropriate.

Robert L. Noland Leadership Award

The Robert L. Noland Leadership Award is a cash award of \$2,000 for upperclass students who exhibit qualities of outstanding leadership. The kind of leadership to be recognized is most often expressed in personal actions that have helped other people and that have inspired others to fulfill their leadership capabilities. The scholarship was set up by Ametek in 1978 in honor of its president, Robert L. Noland, a Caltech alumnus. Two or more awards are generally made each year.

Rodman W. Paul History Prize

The Rodman W. Paul History Prize was established in 1986 by some of his many colleagues and friends to honor Professor Paul's 35 years of teaching and research at the Institute. The prize is awarded annually to a junior or senior who has shown unusual interest in and talent for history.

Doris S. Perpall SURF Speaking Prize

Robert C. Perpall (B.S. '52, M.S. '56) endowed this prize in memory of his late wife, Doris S. Perpall, to encourage students to prepare excellent SURF presentations. SURF Seminar Day is the first round of the Perpall Speaking Competition. The best presentations in each session are nominated for advancement to a second round, held in November. The final round is held in January. Three prizes are awarded annually, a first prize of \$500; second prize, \$300; third prize, \$200.

Howard Reynolds Memorial Prize in Geology

The Howard Reynolds Memorial Prize in Geology is awarded to a sophomore or junior who demonstrates the potential to excel in the field of geology, and who actively contributes to the quality of student life at Caltech.

Herbert J. Ryser Scholarships

The Herbert J. Ryser Scholarships were established in 1986 in memory of H. J. Ryser, who was professor of mathematics at Caltech from 1967 to 1985. Professor Ryser contributed greatly to combinatorial mathematics and inspired many students with his carefully planned courses. The scholarships are given on the basis of merit, preferably in pure mathematics. Recipients are selected by the executive officer for mathematics after consulting the faculty. This year the scholarship is worth \$6,000.

Richard P. Schuster Memorial Prize

This award is made from a fund established by family, friends, and colleagues of Richard P. Schuster, Jr., a graduate of Caltech and the Institute's director of development at the time of his death. The recipient is a junior or senior in chemistry or chemical engineering; selection is based on financial need and a demonstration of academic promise.

Eleanor Searle Prize in Law, Politics, and Institutions

The Eleanor Searle Prize was established in 1999 by friends and colleagues to honor Eleanor Searle, who was the Edie and Lew Wasserman Professor of History at Caltech. The prize will be awarded annually to an undergraduate or graduate student whose work in history or the social sciences exemplifies Eleanor Searle's interests in the use of power, government, and law.

Don Shepard Award

Relatives and friends of Don Shepard, class of 1950, have provided this award in his memory. The award is presented to a student, the basic costs of whose education have already been met but who would find it difficult, without additional help, to engage in extracurricular activities and in the cultural opportunities afforded by the community. The recipients—freshmen, sophomores, and juniors—are selected on the basis of their capacity to take advantage of and to profit from these opportunities, rather than on the basis of their scholastic standing.

Hallett Smith Prize

The Hallett Smith Prize was established in 1997 to commemorate Professor Smith's long career as one of this century's most distinguished Renaissance scholars. The cash prize is given annually by the literature faculty to the student who writes the finest essay on Shakespeare.

Paul Studenski Memorial Fund Prize

This travel grant is awarded to a Caltech undergraduate who would benefit from a period away from the academic community in order to obtain a better understanding of self and his or her plans for the future. The recipient is selected by the Caltech Y Studenski Committee.

Alan R. Sweezy Economics Prize

The Alan R. Sweezy Economics Prize was established in 1995 by family, friends, and colleagues to honor Professor Sweezy for his 36 years of teaching and research at the Institute. The prize is awarded annually to a junior or senior who has shown unusual interest in and talent for economics.

Frank Teruggi Memorial Award

The Frank Teruggi Memorial Award was established in 1998 by friends and classmates of the late Frank Teruggi, a Caltech undergraduate who was murdered in Chile in 1973, during the military coup led by Augusto Pinochet.

The annual award of \$500 honors the spirit of Frank's life, especially "in the areas of Latin American Studies, radical politics, creative radio programming, and other activities aimed at improving the living conditions of the less fortunate."

Morgan Ward Prize

The Morgan Ward Prize was established by the department of mathematics in 1963 to honor the memory of Professor Morgan Ward in recognition of his long service to mathematics and to the Institute. The competition is open only to freshmen and sophomores. An entry consists of a mathematical problem together with a solution or a significant contribution toward a solution. One or more winners are selected by a faculty committee acting on the advice of student judges. Each prize of \$75 is funded by the same source used to sponsor the Eric Temple Bell Prize.

Fredrick J. Zeigler Memorial Award

The Fredrick J. Zeigler Memorial Award was established in 1989 to honor Fredrick J. Zeigler, a member of the class of 1976 and an applied mathematics major. The award, which carries a cash prize of \$2,500, is given to a pure or applied mathematics student in his or her sophomore or junior year. Selected by the faculty in pure and applied mathematics, the award recognizes excellence in scholarship as demonstrated in class activities or in the preparation of an original paper or essay in any subject area.

Note: Prizes and awards may be subject to federal and state income tax.

GRADUATION REQUIREMENTS, ALL OPTIONS

.....

To qualify for a Bachelor of Science degree at the Institute, students must obtain passing grades in each of the required courses listed below; must satisfy the additional requirements listed under the undergraduate options; and must achieve a grade-point average of not less than 1.9. Students must also register for the appropriate number of units that results in normal progress toward a B.S. degree.

The requirements for the B.S. degree are the ones stated in the catalog published in the first year of a student's enrollment at Caltech, under normal circumstances. Changes to those requirements can occur due to actions and decisions made by the student's

option, the registrar, the Curriculum Committee, or the Faculty Board. A student may elect to satisfy the requirements stated in a catalog from a different year than that under which the student was registered by first obtaining approval from the Registrar's Office.

Students must register for the Institute requirements in the year specified, unless they have previous credit. If for some reason they are not able to complete the requirements during the proper year, they must register at the earliest possible opportunity. (The Curriculum Committee may in unusual cases excuse undergraduate students from any of the following Institute or option requirements upon presentation of petitions.)

The Institute unit system is described in the opening paragraphs of section five.

Core Institute Requirements, All Options

A Caltech education requires not just the depth of an option, but also considerable breadth in basic science, humanities, and social science. Caltech's core curriculum prepares students for the interdisciplinary nature of contemporary research in science and technology. This encourages a culture of problem solving, collaboration, and communication while providing valuable experience in all fields of science. Significant study in the humanities and social sciences is an important component of Caltech's core curriculum, giving alumni the ability to navigate the societal, political, and economic factors that influence, and are influenced by, their work.

The following requirements are applicable to incoming freshmen for 2008–09 and subsequent years. Some information for continuing students has been provided as footnotes, but guidance on special cases must be sought. Courses used to satisfy core requirements may not be used to satisfy option electives.

<i>Course</i>	<i>Units</i>
1. Freshman Mathematics (Ma 1 abc).....	27
2. Sophomore Mathematics (Ma 2 ab).....	18
3. Freshman Physics (Ph 1 abc).....	27
4. Sophomore Physics (Ph 2 ab or Ph 12 abc ¹)	18
5. Freshman Chemistry (Ch 1 ab).....	15
6. Freshman Biology (Bi 1) ²	9
7. Menu Class (currently Ay 1, Ch/APh 2, ESE 1, Ge 1, IST 1, or IST 4)	9
8. Freshman Chemistry Laboratory (Ch 3 a) ³	6
9. Additional Introductory Laboratory	6
10. Scientific Writing ⁴	3
11. Humanities Courses (as defined below).....	36
12. Social Sciences Courses (as defined below)	36

13. Additional Humanities and Social Sciences Courses.....	36
14. Physical Education	9

¹ Students taking Ph 12 a but not Ph 12 c must take one term in Statistical Physics or Thermodynamics from the list: Ph 2 b, APb 17 a, Ch 21 c, Ch 24 a, or ME 18 a.

² Bi 8 and Bi 9, if taken in the freshman year, are an acceptable alternative to Bi 1.

³ This requirement can also be met by completing Ch 3 b, Ch 3 x, or Ch 4 a.

⁴ This requirement may be met either by taking a course approved by the student's option to satisfy this requirement, or by taking En 84.

Menu Classes

Menu classes are specifically designed for breadth. The intent of the menu class requirement is to introduce students to a subject that they did not plan to study. In many cases, it is the only class in that subject that they ever take; in other cases, they may decide to take more classes in that subject as a result. Students cannot take a menu class in a subject that they have already taken classes in or in their current option. This requirement must be completed by the end of sophomore year.

Introductory Laboratory Requirement

All students are required to take at least 12 units of laboratory work in experimental science during their freshman and sophomore years. Ch 3 a (6 units) or Ch 3 x (6 units) shall be taken during the freshman year. The additional 6 units must be chosen from one of the following: APh/EE 9 (6 units), APh 24 (6 units), Bi 10 (6 units), Ch 3 b (8 units), Ch 4 ab (9 units per term), Ph 3 (6 units), Ph 5 (9 units), Ph 8 bc (6 units), or a more advanced laboratory. Computational laboratory courses may not be used to satisfy this requirement.

Humanities and Social Sciences Requirements

All students must complete satisfactorily 108 units in the Division of the Humanities and Social Sciences. Of these, 36 must be in the humanities (art, English, film, history, history and philosophy of science, humanities, music, philosophy, and, with certain restrictions, languages) and 36 in the social sciences (anthropology, business economics and management, economics, law, political science, psychology, social science), in each case divided equally between introductory and advanced courses. The remaining 36 may be drawn from humanities and social sciences, including HSS tutorial courses. They may *not* include reading courses unless credit has been granted by petition to the Humanities or Social Science faculty. In general, no more than 18 units of freshman humanities may be counted toward the 108-unit requirement.

Entering freshmen are required to take two terms of freshman humanities; that is, humanities courses numbered 20 or below in the *Catalog*. These classes introduce students to the basic issues in the three core disciplines of English, history, and philosophy. Successful completion of two terms of freshman humanities is a prerequisite for all humanities courses, except for foreign

languages. It is *not* a prerequisite, however, for introductory social sciences. The freshman humanities classes may be taken in any two terms of the freshman year. Other humanities courses numbered 30 or greater are open only to students who have fulfilled the freshman humanities requirement.

To encourage breadth, students will have to take their two freshman humanities classes in different disciplines, the disciplines being English, history, and philosophy.

A student must take 18 units of advanced humanities courses as well. The classes that count as advanced humanities courses are those numbered 90 or above in art history, English, film, history, history and philosophy of science, humanities, language (except for the first four terms of each language), music, and philosophy. With the permission of the executive officer for the humanities, the advanced humanities classes may include any of the foreign language classes beyond the fourth term; students will receive permission except for courses in their native language. The first four terms of a foreign language sequence do not count toward the 36-unit humanities requirement; however, every term receives credit toward the final 36 units of the 108-unit requirement in HSS.

Since writing is a crucial skill, all humanities courses, with the exception of some foreign languages and courses numbered between 29 and 90, require at least 4,000 words of composition. Instructors give extensive feedback on written work and help students improve their prose. As entering students may not be fully prepared for the writing in freshman humanities, all freshmen and transfer students take a writing assessment before the beginning of the fall term. On the basis of this assessment, some students may be required to pass En 1 ab or En 2 before entering either freshman or advanced humanities classes.

Students are required to take two introductory social science courses and 18 units of related advanced undergraduate social science courses. The introductory social science courses must be drawn from the following list: either An 22 or An 23, Ec 11, Law 33, PS 12, either Psy 15, Psy 16, or Psy 20, SS 13. The 18 units of advanced undergraduate social science courses (numbered 100 and above), in fields following at least one of their introductory courses, must be taken as indicated below.

<i>Introductory Course</i>	<i>Following Course</i>
An 22 or 23	advanced anthropology
Ec 11	advanced economics or BEM (except BEM 101)
Law 33	advanced law
PS 12	advanced political science
Psy 15, 16, or 20	advanced psychology
SS 13	advanced economics or political science, or BEM (except BEM 101)

For instance, a student who has taken An 22 and Ec 11 may use 18 units of advanced anthropology courses, or 18 units of advanced economics, or 9 units of advanced anthropology and 9 units of advanced economics to fulfill the advanced social science requirement.

Physical Education Requirement

Before graduation each undergraduate is required to successfully complete 9 units of physical education. This requirement may be satisfied entirely or in part by participation in intercollegiate athletics, or successful completion of physical-education class coursework. All grades are issued pass/fail. A maximum of 6 units per term may be applied toward graduation requirements with the total not to exceed 36 units. Participation as a bona fide member of an intercollegiate team for the period covered by the sport in a given term satisfies the requirement for that term.

A broad program of instruction is provided each term. Late registration is permitted during the first week of each term, provided there is space available and with permission of the instructor. Standards for evaluation of student performance will be clearly defined at the beginning of each class.

Scientific Writing Requirement

The scientific writing requirement can be satisfied by taking an appropriate course offered by any division, or by taking En 84. All options also require a three-unit course in oral communication. Some options combine these two requirements into one course. At the discretion of the option, the scientific writing requirement can be satisfied by three units of additional work associated with a senior thesis, focused on effective written scientific communication.

<i>Options</i>	<i>Requirements</i>	
	<i>Oral</i>	<i>Written</i>
ACM, APh, CS, EE, EAS, ME	E 10	E 11
Ay	Ay 30	Ay 31
Bi	Bi 24	same
BEM, Ec, PS	BEM/Ec/SS 20	same
ChE	ChE 126	Ch/ChE 91
Ch	Ch 90	Ch/ChE 91
En, H, HPS, PI	En 84	same
GPS	Ge 109	Ge 13
Ma	Ma 10	Ma 11
Ph	Ph 70	same

First-Year Course Schedule, All Options

Differentiation into the various options begins in the second year.

		Units per term		
		1st	2nd	3rd
Ma 1 abc	Freshman Mathematics	9	9	9
Ph 1 abc	Freshman Physics	9	9	9
Ch 1 ab	General Chemistry	6	9	0
Bi 1	Biology and Biophysics of Viruses	0	0	9
Ch 3 a	Fundamental Techniques of Experimental Chemistry ¹	6	or 6	or 6
Introductory courses in the humanities and social sciences. A wide choice of alternatives will be available to students; the registrar will announce the offerings for each term.		9	9	9
Introductory Laboratory Courses ²		x	x	x
Menu Course ³ or Additional Electives		x	x	x
PE	Physical Education ⁴	3	3	3

x—Except for the minimum laboratory unit requirement, the number of units chosen here is optional. If a student chooses no electives except physical education and takes the minimum permissible laboratory courses, the total unit requirement will usually be in the range of 39 to 45. A total load—including electives—of more than 48 units per term is considered a heavy load. Loads of more than 51 units for freshmen or 54 units for upperclass students require approval by the dean of students.

¹ This course is offered in each of the three terms.

² The additional 6 units must be chosen from one of the following: APb/EE 9 (6 units), Bi 10 (6 units), Ch 3 b (6 units), Ch 4 ab (6 units per term), Ph 3 (6 units), or a more advanced laboratory course.

³ Students entering 1996-97 or later years must take a menu course (currently Ay 1, Ch/APb 2, ESE 1, Ge 1, IST 1, or IST 4) in their freshman or sophomore year. These courses are offered third quarter only. It is also possible to take one of these courses as an elective.

⁴ Three terms (9 units) of PE are required for the B.S. degree. Students need not elect to take the required PE in the freshman year. It may be taken in any three terms before graduation.

Aerospace Minor

The aerospace minor is intended to supplement one of Caltech's undergraduate degrees and is designed for students who wish to broaden their knowledge beyond their normal major or who may wish to pursue a graduate program involving aerospace or aeronautical engineering. Students completing the aerospace minor requirements will have the phrase "minor in aerospace engineering" added to their transcripts.

AE Minor Requirements

1. Complete Ae 105 abc.
2. Complete a second three-term 100-level Ae class, chosen from

Ae 101 abc, 102 abc, 103 abc, 104 abc, 121 abc, Ae/Ge/ME 160 ab, or 27 units of selected Ae courses approved by the minor adviser. All Ae courses to be applied to fulfill the aerospace minor requirements must be taken for grades, and students must obtain a grade of B or higher. Courses that are used to satisfy the aerospace minor cannot be used to satisfy course requirements in the major options. Courses taken as part of the aerospace minor are counted toward the total 486-unit Institute graduation requirements. A typical course sequence would be to take Ae 105 abc and the second Ae course in the senior year.

Applied and Computational Mathematics Option

The undergraduate option in applied and computational mathematics is for those students who want to combine their basic studies in mathematics with considerable involvement in applications. This program is designed to give students a thorough training in fundamental computational and applied mathematics and to develop their research ability in a specific application field. The fields of application include a wide range of areas such as fluid mechanics, materials science, and mathematical biology, engineering applications, image processing, and mathematical finance. The training essential for future careers in applied mathematics in academia, national laboratories, or in industry is provided, especially when combined with graduate work, by successful completion of the requirements for an undergraduate degree in applied and computational mathematics. The program is similar in general outline to the mathematics option, with additional requirements to ensure a balance between courses that develop mathematical concepts and courses that show the interplay of these concepts with a variety of applications. Complete programs will be worked out with faculty advisers.

Option Requirements

1. Ma 5 abc or Ma 108 abc, and ACM 95 abc, ACM 101 abc, and E 10.
2. An approved sequence of three one-quarter courses to be selected from the following: ACM 104, ACM 105, ACM 106 abc, ACM 113, ACM 116, ACM/ESE 118, ACM 126 ab.
3. One of the following (or an approved three-term combination totalling at least 27 units): Ma/CS 6 abc, Ma 109 abc, Ma 110 abc, Ma 120 abc, Ma 121 abc, Ma 122 a, EE/Ma 126 ab, EE/Ma 127 ab, CS/EE/Ma 129 abc, Ma 151abc.
4. One 27-unit 100 or higher level course in science or engineering not in ACM or Ma and approved by the student's adviser.
5. Passing grades must be obtained in a total of 483 units, including the courses listed above.

Typical Course Schedule

¹ See items 2 and 3 under option requirements.

Applied Physics Option

The applied physics option is designed to extend knowledge of the principles of pure physics to applications pertinent to applied physics or engineering. Research in applied physics typically centers on problems of technological concern. The applied physics option draws its faculty from the Divisions of Physics, Mathematics and Astronomy; Engineering and Applied Science; Chemistry and Chemical Engineering; and Geological and Planetary Sciences. The interdisciplinary nature of this option allows a flexibility and range in curriculum, appropriate to the student's particular research interests, that may result in a mixture of courses and research in different divisions.

Specific subject areas of interest in the program cover a broad spectrum of physics related to important fields of technology. Photonics areas include multiwavelength fiber telecommunications, integrated microphotonic and nanophotonic devices, holographic data processing and storage, and optical approaches to quantum computation. Solid-state materials and device work is focused on nanostructured materials and devices, wide bandgap semiconductors and heterostructures for optoelectronics, photovoltaics, novel memory devices, and spin-dependent transport. Biophysics topics include single-molecule-scale studies of the mechanics of DNA, proteins, and their assemblies. Plasma-physics research is concentrated on spheromak plasmas for fusion application, plasma

processes occurring in the sun, and the dynamics of pure electron plasmas. Transport in fluids spans processes at low and high Reynolds numbers, including micro/nanofluidic, optofluidic, or biofluidic devices, optical trapping in fluids, dissipation behavior in cantilever arrays, pattern formation and phase separation in thin-films or bulk layers, cellular, pulmonary, ocular, or cardiovascular flows, thin-film patterned growth by chemical vapor deposition and etching, convection-diffusive problems, aeronautical flows, combustion, etc.

The undergraduate curriculum attempts to reflect and maintain a close relationship with the various disciplines. This facilitates a transition to or from any of these, if at any time in the student's course of study and research this would be considered beneficial.

Attention is called to the fact that any student whose grade-point average is less than 1.9 at the end of the academic year in the subjects listed below under option requirements may be refused permission to continue work in this option.

Option Requirements

1. E 10 and E 11 plus any three of the following: APh/EE 9 b, APh 24, Ph 3, Ph 5, Ph 6, or Ph 7; E 11 can be satisfied by three units of additional work associated with the senior thesis (APh 78).
2. APh 17 abc, Ph 106 abc, and either APh 125 ab, Ch 125 ab, or Ph 125 ab.
3. ACM 95 abc.
4. Either APh 78 abc or one term of APh 77 and one chosen from the following: APh 77, Ph 77, EE 91, Ch 6, Ae/APh 104 bc, MS 90, or MS 125.
5. 27 additional units of APh courses numbered over 100, which must include one of the following sequences: APh 101 abc, APh 105 abc, APh 114 abc, APh/Ph 115 ab, APh 156 abc, BE/APh 161, BE/APh 162, and possibly Ph/Bi 103 b, APh/EE 183 abc, APh 190 abc, or the sequence APh/EE 130, EE/APh 131, and APh/EE 132. Note that APh 100 and APh 200 do not satisfy this requirement.
6. Passing grades must be earned in a total of 486 units, including the courses listed above. None of the courses taken to satisfy option requirements may be taken on a pass/fail basis.

Typical Course Schedule

		Units per term

Suggested Electives

The student may elect any course that is offered in any term provided he or she has the necessary prerequisites for that course. The following subjects are especially suitable for a well-rounded course of study. They need not be taken in the year suggested.

Second Year	Third Year	Fourth Year
APh 23, APh 24, Ma 5 abc, MS 115 ab	Aph 77, Ph 77 abc, EE 114 ab, Ch 6 ab, Ge 101, Aph 100, ME 19 ab	Aph 77, APh 100, APh 101 abc, APh 105 abc, APh 114 abc, APh/Ph 115 ab, ACM 101 abc, ACM 104, Ch 125 abc, Ph 125 abc, Ph 129 abc, Ph 77 bc

More Specialized Courses

Aph 156 abc, BE/APh 161, APh/EE 183 ab, APh 190 abc, APh/EE 130, EE/APh 131, APh/EE 132, ChE 103 abc, EE 91 ab, Ge 102, Ge 103.

Astrophysics Option

Modern astronomy—certainly as practiced at Caltech—is essentially astrophysics. With the goal of understanding the physical processes that govern the universe, its constituents, and their evolution, astronomy uses the apparatus and methodology of physics to gather and interpret data.

The astrophysics option is designed to give the student an understanding of the basic facts and concepts of astronomy today, to stimulate his or her interest in research, and to provide a basis for graduate work in astronomy/astrophysics. The sequence (Ay 20, 21) constitutes a solid introduction to modern astrophysics and

may be taken either sophomore or junior year, with more advanced courses (Ay 101, 102, plus Ay electives) taken in the junior and senior years. It is desirable for a student to gain as broad a background as possible in related fields of science and engineering.

Attention is called to the fact that any student whose grade-point average is less than 1.9 at the end of an academic year in the subjects listed in the Division of Physics, Mathematics and Astronomy may, at the discretion of his or her department, be refused permission to continue the work in this option.

Option Requirements

1. Ay 20, 21, 101, 102, 30 or 141, 31, Ph 125 abc or APh 125 abc, and Ph 106 abc.
2. Ph 3 plus any two of Ph 5, Ph 6, Ph 7, or Ay 105. APh 23 and 24 taken as a pair may be substituted for one of these labs.
3. 54 additional units of Ay or Ph courses.
4. 27 additional units of science or engineering electives, of which 18 must be outside the Division of Physics, Mathematics and Astronomy. Core classes (see page 176) or other introductory-level courses do not count toward fulfillment of this requirement.
5. Passing grades must be earned in a total of 486 units, including the courses listed above.

An ability to present one's work is vital to a successful career in research and teaching. Ay 30 satisfies the oral communications requirement, but for further development, students are *also* urged to sign up for Ay 141 in their junior and senior years. Ay 31 satisfies the written communication requirement. Students are encouraged (but not required) to undertake research leading to a senior thesis; credit for this work is provided through Ay 78. Nonthesis research credits may be earned through Ay 142 with a maximum of 9 units per term. Computational skills may be acquired through Ph 20–21 and/or ACM 106, or equivalent classes.

186

Suggested Electives

The student may elect any course offered in any division in a given term, provided that he or she has the necessary prerequisites for that course. The following courses are useful to work in various fields of astronomy and astrophysics: ACM 95, ACM 106, APh 23/24, Ay 105, Ay 121–127, EE 45, EE 91, EE/Ae 157, Ge/Ay 11 c, Ge 103, Ge/Ch 128, Ge 131, Ge/Ay 132, 133, 137, Ma 4, Ma 12, Ma 112, Ph 20–22, Ph 77, 101, 127, 129, 136, 199 (this is not necessarily a complete list).

Biology Option

The undergraduate option in biology is designed to build on a solid foundation in mathematics and physical science by providing an introduction to the basic facts, concepts, problems, and methodologies of biological science. The option serves as a basis for graduate study in any field of biology or for admission to the study of medicine. Instruction is offered in the form of participation in the ongoing research programs of the division, as well as in formal course work. Course work emphasizes the more general and fundamental properties of living organisms, and areas of current research interest, rather than the traditional distinct fields within the life sciences.

The division encourages undergraduate participation in its research program and believes that research participation should be a part of each student's program of study. Students may elect to prepare an undergraduate thesis (Bi 90). Research opportunities may be arranged with individual faculty members, or guidance may

be obtained from a student's individual faculty adviser in the division or from the biology undergraduate student adviser.

The requirements listed below for the biology option are minimal requirements. An adequate preparation for graduate work in biology will normally include additional elective research or course work in biology and/or advanced course work in other sciences or in mathematics. Flexibility to accommodate varied individual scientific interests, within the broad scope of biology, is achieved through the provision of elective courses, arrangements for individual research (Bi 22), and tutorial instruction (Bi 23). In addition, arrangements may be made to take courses at neighboring institutions in fields of biology that are not represented in our curriculum.

Premedical Program

The undergraduate course for premedical students is essentially the same as that for biology students and is intended as a basis for later careers in research as well as in the practice of medicine. It differs in some respects from premedical curricula of other schools; however, it has been quite generally accepted as satisfying admission requirements of medical schools.

It is recommended that all students contemplating application to medical school consult with the premed adviser, Angela Wood, at the Career Development Center, or David Chan, in the Division of Biology.

187

Option Requirements

1. Bi 8, Bi 9, Bi 117, Bi 122, Bi/CNS 150, and Ch 41 abc.
2. One advanced laboratory course chosen from Bi 123, Bi/CNS 162, Bi 180, Bi 227, or at least 12 units of independent research such as Bi 22.
3. Two courses chosen from Bi/Ch 110, 111, 113, and/or Bi/Ch 132.
4. Scientific writing requirement met by taking Bi 24 (six units), or by taking any other writing course such as En 84 or Ge 13 (three units) plus oral presentation at SURF Seminar Day or equivalent, with option representative approval.
5. None of the courses satisfying requirements 1–4 may be taken pass/fail, except Bi 8 and Bi 180.
6. At least six additional biology courses to a total of 146 units in biology must be taken and passed. Bi 1, Bi 2, and Bi 10 cannot be counted toward this total. Distribution requirement: these additional courses must be drawn from at least two of the following course "tracks" defined below: biochemistry, genetics, developmental biology, neurobiology, computational and systems biology, organismal and biomedical biology, cell biology, and interdisciplinary technology. At least four of these additional courses (including courses drawn from at least two tracks)

must be taken for letter grades. At least two of these additional graded courses (from different tracks) must be for at least nine units.

7. Passing grades must be earned in a total of 486 units, including the courses listed above.

Biology Tracks

Individual classes may be relevant to more than one track, but classes cannot be double counted toward the distribution requirement. Courses included in the general option requirements that provide logical background for these tracks are indicated in parentheses; however, these cannot be counted toward the distribution requirement.

- a. Biochemistry and molecular biology
(Bi 8, Bi 9)
Bi/Ch 110, 111, 113 (if not taken to satisfy item 3; no double counting)
Bi 129, Ch 132, BMB/Bi/Ch 170 abc, Bi 189, Bi/Ch 205, Bi/Ch 211
Note: Ch 24 and Ch 7 or Ch 145 are also recommended for students interested in this track.
- b. Genetics
(Bi 8, Bi 122)
Bi 123, 180, 188, 190
Microbial biology subtrack: ESE/Bi 166, ESE/Bi 168 with Bi 180
- c. Developmental biology and evolution
(Bi 117, Bi 122)
Bi 123, Bi/CNS 158, Bi 182, 188, 190, 204, 214
- d. Neurobiology
(Bi/CNS/Psy 150)
Bi 129, 133, 152, 156, 157, 162, 186, 202, 216, 217, 218, CNS/Bi 176
The sequence of courses Bi/CNS 150, Bi 152, Bi 156, and Bi/CNS 157 is intended to provide a comprehensive introduction to the field of neurobiology.
Behavior/psychology subcluster: CNS/SS/Psy/Bi 102 ab, CNS/Bi/Psy 120, 131, 133, SS/Psy/Bi/CNS 140, Bi 152, Bi 156, 176, 216, 217
- e. Computational and systems biology
(Bi/CNS/Psy 150)
CNS/Bi 176, CNS/Bi/BE/Ph 178, CNS/Bi/EE 186, CNS/Bi/Ph/CS 187, CS/CNS/Bi 191 ab, Bi 204, CNS/Bi 221, CNS/Bi 247
CS/programming courses are highly recommended for those interested in this track.

- f. Organismal
Bi 114, 115, 145 ab, 157, 158, 188, 202, 214, 215
- g. Cell biology
(Bi 9)
Bi 113, if not taken to satisfy requirement item 3
Bi 129, 145 ab, 189, 205, 215
- h. Interdisciplinary, technology approaches
BE/Bi 105, Bi 177, 227

Planning the Biology Course Schedule

Course requirements for biology are designed to be met by students taking Bi 8 and Bi 9 starting in their second year. However, many students interested in biology elect to take these courses in their first year. Those passing Bi 8 and Bi 9 in their first year may be excused from the Institute requirement to take Bi 1.

Students may place out of the option requirement to take Bi 8 or Bi 9 by passing an exam and then earning a passing grade in Bi/Ch 111 or Bi/Ch 113, respectively, instead.

Bi 10 is not required for the biology option but is commonly taken by biology students to meet the Institute introductory laboratory requirement.

Bi 123 is not required but is recommended for students planning to take any additional courses in genetics.

Prerequisites listed for individual biology courses are advisory, not compulsory. They indicate the kind of background that is assumed for the work level of the course. In general they may be waived with the instructor's permission.

Ch 24 ab is strongly recommended for students interested in postgraduate work in biology, as most graduate programs expect entering students to have taken a course in physical chemistry.

Additional courses of potential interest to biology majors include Ge 11 b, BE/APh 161, BE 163, and advanced geobiology courses.

Business Economics and Management Option

The business economics and management (BEM) option provides students with the analytical tools to operate successfully in a modern volatile business environment. The emphasis is on strategy, design (markets, organizations, networks), finance, and law in a free-market competitive or strategic situation, as well as in a highly politicized environment. Today's business environment is complex; the required courses in this option are therefore highly analytical. The formal nature of the required courses can be complemented by case-study courses.

Option Requirements

1. Ec 11, PS/Ec 172, BEM/Ec/SS 20, BEM 101, Law 33.
2. BEM 103, BEM 105, BEM 106.
3. ACM/ESE 118 or Ec 122.
4. Five courses, to be chosen from the menu (may be taken pass/fail): BEM courses (excluding the ones listed under [1] and [2] above), Ec 105, 106, 116, 121 ab, 122, 123, 132, 135, 145, 155, Ec/PS 160 abc, PS 12, PS/Ec 173, Psy 15, 20, 115, ACM 113, ACM 116, Ma 112 a, Law 133, 134, 135.
5. 45 additional units of science (including anthropology, economics, political science, psychology, social science), mathematics, and engineering courses; this requirement cannot be satisfied by courses listed as satisfying the introductory laboratory requirement or by any course with a number less than 10 (may be taken pass/fail).
6. Passing grades must be earned in a total of 486 units, including all courses used to satisfy the above requirements.

¹See option requirements 4 and 5.

Chemical Engineering Option

The chemical engineering option is designed to prepare its students for either graduate study or research and development work in industry. This is accomplished by providing broad and rigorous training in the fundamentals of chemical engineering while maintaining a balance between classroom lectures and laboratory experience. The program also strives to develop in each student self-reliance, creativity, professional ethics, an appreciation of the societal impact of chemical engineering, and an understanding of the importance of continuing intellectual growth.

Chemical engineering involves applications of chemistry, physics, mathematics, and, increasingly, biology and biochemistry. In addition to these disciplines, the chemical engineering curriculum includes the study of applied and computational mathematics, fluid mechanics, heat and mass transfer, thermodynamics, chemical kinetics and chemical reactor design, and process control. Because of this broad-based foundation that emphasizes basic and engineer-

ing sciences, chemical engineering is perhaps the broadest of the engineering disciplines.

Because many industries utilize some chemical or physical transformation of matter, the chemical engineer is much in demand. He or she may work in the manufacture of inorganic products (ceramics, semiconductors, and other electronic materials); in the manufacture of organic products (polymer fibers, films, coatings, pharmaceuticals, hydrocarbon fuels, and petrochemicals); in other process industries; or in the biotechnology, pharmaceutical, or biomedical industries. Chemical engineering underlies most of the energy field, including the efficient production and utilization of coal, petroleum, natural gas, and newer technologies such as biofuels, fuel cells, and solar energy conversion technologies. Air and water pollution control and abatement are also within the domain of expertise of chemical engineers. The chemical engineer may also enter the field of biochemical engineering, where applications range from the utilization of microorganisms and cultured cells, to enzyme engineering and other areas of emerging biotechnology, to the manufacture of foods, to the design of artificial human organs.

Key educational objectives of our chemical engineering curriculum focus on developing an ability to synthesize and apply knowledge from the many subjects studied to the design of systems, components, processes, or experiments, subject to technical, economic, environmental, and/or social constraints. Problems illustrating the design process are integrated into the core courses. The senior laboratories integrate design with the construction and experimental evaluation of a system, process, or component.

Freshman and sophomore students normally take the core courses in mathematics, physics, chemistry, and biology (Ma 1 abc, Ma 2 ab, Ph 1 abc, Ph 2 ab, Ch 1 ab, and Bi 1). They also take the second-year organic chemistry course (Ch 41 abc) and the basic chemical engineering courses (ChE 63 ab and ChE 64). It is strongly recommended that they also take a course in computer programming (e.g., CS 1 or CS 2).

Undergraduate research is emphasized, and students are encouraged, even in the freshman year, to participate in research with the faculty. In order to obtain a basic intellectual background, all students take courses in the fundamentals of chemical engineering through the junior year. During the junior and senior years, students diversify into one of four tracks (biomolecular, environmental, materials, or process systems) where they pursue concentrated study in their chosen area of chemical engineering. An optional senior thesis provides an opportunity to pursue independent research in lieu of one of the senior laboratories.

Attention is called to the fact that any student whose grade-point average is less than 1.9 at the end of an academic year in the subjects listed under the Division of Chemistry and Chemical

Engineering may, at the discretion of the faculty in this division, be refused permission to continue the work in this option.

Option Requirements

1. Ch 3 b, Ch 41 abc, ChE 63 ab, ChE 64, ACM 95 abc, Ch 21 a, Ch 21 b (or Ch 24 a), ChE 101, ChE 103 abc, ChE 105, ChE 126, Ch/ChE 91 (or En 84), three science/engineering electives (two if ChE 90 ab is selected), and one of Ec 11, BEM 101, or BEM 103¹.
2. Completion of a track (biomolecular, environmental, process systems, or materials), each consisting of eight science or engineering courses. Students should inform the executive officer of their track choice by the beginning of the spring quarter of the sophomore year by providing a planned schedule for completion of all degree requirements. Requirements for the tracks are as follows.
 - a. Biomolecular track: Bi/Ch 110, BE 151–153, [ChE/BE 163 or ChE/BE 169²], [ChE 130 or ChE 90 ab], two additional bioengineering or related electives.
 - b. Environmental track: ESE/GE 148 abc, [ChE 128 or ChE 90 ab], four additional ESE or related courses.
 - c. Process systems track: ChE 110 ab, [ChE 128 or ChE 90 ab], five engineering electives.
 - d. Materials track:
 - i. ChE 128 or ChE 90 ab.
 - ii. One course on materials synthesis and processing: Ch/ChE 147², ChE 115 or MS 133.
 - iii. One pair of courses on the physical basis of structure and properties selected from [Ch 120 a and ChE/Ch 148²], or [MS 131 and MS 132], or APh 114 ab.
 - iv. Four materials science elective courses; these may be any combination of the remaining courses from those listed above, and/or any of the following courses: ChE/Ch 155, ChE/Ch 164, Ae/AM/CE/ME 102 abc, Ae/Ge/ME 160 ab, Ae/AM/MS/ME 213, Ae/AM/CE/ME 214 abc, AM/ME 165 ab, APh 109, APh 125 abc, Ch 121 ab, Ge 114 ab, or any MS courses.
3. Passing grades must be earned in all courses required by the Institute and the option. None of the courses satisfying option requirements may be taken pass/fail.

¹ These 9 units partially satisfy the Institute requirements in humanities and social sciences.

² Given in alternate years.

² See option requirements.

Chemistry Option

Study in the chemistry option leads, especially when followed by graduate work, to careers in teaching and research at colleges and universities, in research for government and industry, in the operation and control of manufacturing processes, and in management and development positions in the chemical industry.

A first-year general chemistry course is taken by all freshman students. The emphasis is on fundamental principles and their use in systematizing descriptive chemistry. Students who show themselves to be qualified and receive the instructor's consent may elect to take an Advanced Placement chemistry course (at least two terms from Ch 21 ab or Ch 41 ab). The one-term required laboratory course (Ch 3 a) presents basic principles and techniques of synthesis and analysis and develops the laboratory skills and precision that are fundamental to experimental chemistry. The laboratory in the following two terms (Ch 4 ab), normally taken concur-

rently with Ch 41, introduces the student to methods of synthesis, separation, and instrumental analysis used routinely in research. Qualified students, with the instructor's consent, are allowed to substitute either Ch 3 b or Ch 4 a for the core requirement of Ch 3 a.

Beyond the freshman year, each student in the chemistry option, in consultation with his or her adviser, selects a suitable course of study under the supervision of the division. The requirements of the option are listed below. A student wishing to deviate from these requirements should submit an alternate curriculum, with justifications, for consideration by his or her adviser and the Curriculum and Undergraduate Studies Committee. The chemistry option representative should be consulted for the future scheduling of courses not offered during the current academic year.

Undergraduates in the option must also take chemistry courses below the 100 level for a letter grade with the exception of the following courses, which are only offered on a pass/fail basis: Ch 1, Ch 3 a, Ch 90, and, if taken during the first or second terms of the freshman year, Ch 4 ab, Ch 21 ab, and Ch 41 ab.

Senior Thesis

Students attempting a senior thesis in the chemistry option must complete the following requirements.

1. Three terms (27 units) of Ch 82 are to be completed during the junior and/or senior year of study; continued work from research experiences prior to the commencement of the senior thesis is encouraged.
2. At the time of registering for the first term of Ch 82, the candidate will submit a short (five pages) proposal delineating his/her project for approval by the research mentor and the Chemistry Curriculum and Undergraduate Studies Committee (CUSC).
3. The candidate will present a short progress report (of maximum five pages) at the end of each of the first two terms of Ch 82, describing the current status of the research work and any results obtained. Upon evidence of satisfactory effort, the student will be allowed to continue his/her senior thesis.
4. A thesis of approximately 20 pages (excluding figures and references) will be presented to the mentor and the CUSC at the end of the third term of Ch 82. An oral thesis defense will be arranged by the CUSC. The thesis must be approved by both the research mentor and the CUSC.
5. Upon approval by the research mentor and the CUSC, the Ch 91 requirement for graduation may be satisfied by the written thesis and the progress reports from the first two quarters of Ch 82. If the thesis is being completed during the spring quarter of the senior year, a draft of the thesis is to be submitted by Add Day.

Double Majors

For students simultaneously pursuing a degree in a second option, courses taken as *required* courses for that option can also be counted as chemistry electives (requirement 3, below) where appropriate. However, courses that count toward the electives requirement in the other option cannot simultaneously be counted toward satisfying the elective requirement in chemistry.

The courses listed below would constitute a common core for many students in the option.

Any student of the chemistry option whose grade-point average is less than 1.9 will be admitted to the option for the following year only with the special permission of the Division of Chemistry and Chemical Engineering.

Option Requirements

1. Ch 14 (or ESE 142), Ch 21 abc (or Ch 21 a, Ch 24 ab), Ch 41 abc, Ch 90.
2. A minimum of five terms of laboratory work chosen from Ch 4 ab, Ch 5 ab, Ch 6 ab, Ch 7, Ch 10 c (if taken freshman or sophomore year), Ch 15, and Bi 10.
3. A minimum of five terms of advanced chemistry electives taken for a letter grade from chemistry course offerings at the 100 and 200 level, including cross-listed offerings such as Bi/Ch 110, Bi/Ch 111, Bi/Ch 113, Bi/Ch 132, and ChE/Ch 164, but excluding Ch 180 and Ch 280.
4. Passing grades must be earned in the courses that constitute the approved program of study, including those listed above. None of the courses satisfying option requirements may be taken pass/fail.
5. Passing grades must be earned in a total of 486 units, including courses listed above.

This typical program is not specifically required for graduation in the option, nor is it in any sense a complete program. Students are expected to work out individual programs suitable for their interests and professional goals in consultation with their advisers. Several representative programs, including sets of possible electives, are shown below. These may well approximate choices by students who intend to do graduate work in conventional areas of chemistry.

Suggested Representative Courses of Study for Those Intending Graduate Work in Particular Areas of Chemistry

	<i>Second Year</i>	<i>Third Year</i>	<i>Fourth Year</i>
<i>Inorganic Chemistry</i>	Ch 4 ab, Ch 5 a, Ch 41abc, Ch 102, Ma 2 ab, Ph 2 ab, HSS elective, other elective	Ch 5 b ¹ , Ch 14, Ch 21 abc, Ch elective(s) ² , Ch laboratory ³ , Ch 80 ⁴ , Ch 90, Ch/ChE 91 HSS elective	Ch 6 a or 6 b, Ch electives ²⁻³ , Ch 80 ⁴ , HSS elective

² Ch 112, 117, 120 ab, 121 ab, 122 abc, 135 ab, Ch/CbE 140, Ch 143, 144 ab, Ch/CbE 147, Ch 154 ab, ChE/Cb 155, ESE/Cb/Ge 175 abc, Ch 212, 213 abc, 221.

³ Ch 6 ab, 7, 15, Bi 10.

⁴ Ch 10 abc provides an introduction to research activities and opportunities in chemistry for undergraduates. No more than 27 units of Ch 80 will count toward the 486-unit graduate requirement.

⁵ Students without sufficient math preparation may delay Ch 21 abc and Ch 6 ab until their junior year and take Ch 5 ab and Ch 41 abc during their sophomore year.

⁶ Ch 5 ab, Ch 15, Bi 10.

⁷ Ch 120 ab, 121 ab, 126, Ge/Cb 128, 135 ab, Ch/CbE 140, Ch 144 ab, Ch/CbE 147, ChE/Cb 148, ChE/Cb 164, Ch 166, 221, 227 ab, Ph 106 abc.

⁸ Ch 112, 120 ab, 121 ab, 122 abc, 135 ab, 143, 144 ab, 145, 146, Ch/CbE 147, Ch 154 ab, ChE/Cb 155, ESE/Cb/Ge 175 abc, Ch 242 ab, 247.

⁹ Ch 5 ab, 15, 6 ab, 7.

¹⁰ Ch 122, Bi/Ch 132, Ch 143, 144 ab, 145, 146, 154 ab, BMB/Bi/Ch 170, Ch/Bi 231, Ch 242 ab, 244, 247.

Suggested Elective Courses for the Chemistry Option

1. *Chemical Engineering*: ChE 10, 63, 80, 101, 103, 151, 174.
2. *Biology*: Bi 9, 122, 114, 156, 180.
3. *Engineering*: ACM 95, APh/EE 9, CS 1, CS 2.
4. *Physics*: Ph 3–7, 106, 125, 129, 127.
5. *Humanities*: Ec 11, L 102 or L 130.
6. *Miscellaneous*: Ay 1, Ch/APh 2, Ch 10, ESE 1, MS 115, Ge 1, Ge 140, Ma 108.

Computer Science Option

Study in the computer science option emphasizes rigor and creativity, and is good preparation either for graduate study followed by a research career, or for a variety of professional or entrepreneurial occupations.

The option introduces students to the mathematical and engineering foundations of the discipline. It provides considerable flexibility in course selection, together with a capstone project giving

an opportunity for independent work in an area of the student's choice. Individual programs will be worked out in consultation with faculty advisers (the materials at www.cs.caltech.edu/academics/undergrad_study.html may be helpful for this purpose).

Any student in the computer science option whose grade-point average is less than 1.9 at the end of the academic year in the subjects listed in the option requirements may be refused permission to continue work in the option.

Option Requirements

1. CS 1; CS 2; Ma/CS 6 a or Ma 121 a; CS 21 or CS/EE/Ma 129 a; CS 24; CS 38; E 10, E 11.
2. One of the following:
 - a. Any of the following three-quarter sequences involving a large project in their last quarter: CS 141 abc; CS/EE 181 abc; CS/EE/Ma 129 abc; CS 134 abc; CS 136 abc; CS 139 abc; CS/CNS 174 and two other CS 170-series courses; CS/EE 145 ab and one quarter of a networking project.
 - b. A laboratory project in computer science extending at least two quarters and totaling at least 18 units (normally in CS 81 or CS 90), approved for this requirement by the student's adviser and the CS undergraduate option representative.
 - c. Thesis (EE/CS 80 abc) supervised by a CS faculty member.
3. A total of 63 CS units that are not applied to requirement (1), and that are either numbered CS 114 and above or are in satisfaction of requirement (2).
4. In addition to the above requirements, 36 units in Ma, ACM, or CS; 18 units in EAS or Ma; and 18 units not labeled PE or PA.
5. Units used to fulfill the Institute Core requirements do not count toward any of the option requirements. Pass/fail grading cannot be elected for courses taken to satisfy option requirements. Passing grades must be earned in a total of 486 units, including all courses used to satisfy the above requirements.

¹ Commonly taken during the freshman year.

Control and Dynamical Systems Minor

The CDS minor is intended to supplement one of Caltech’s undergraduate degrees and is designed for students who wish to broaden their knowledge beyond their normal major or who may wish to pursue a graduate program involving control or dynamical systems. Students completing the CDS minor requirements will have the phrase “minor in control and dynamical systems” added to their transcripts.

CDS Minor Requirements

1. Complete either CDS 110 ab and CDS 104, or CDS 101 and CDS 140 ab.
2. Complete a three-term senior thesis approved by the CDS faculty.

All CDS courses to be applied to fulfill the CDS minor requirements must be taken for grades, and students must obtain a grade of B or higher. Students may substitute CDS 110 a for CDS 101 or CDS 140 a for CDS 104 in the above requirements. The senior thesis requirement may be satisfied either by completing a three-term senior thesis in the student’s major option but on CDS subject matter, with approval of the thesis topic by the CDS option representative, or by taking CDS 90 abc.

Courses that are used to satisfy the CDS minor cannot be used to satisfy course requirements in the major options, with the exception that CDS 110 a may be used in EAS options where this course is part of their requirements (e.g., ChE, EE, ME) and the senior thesis requirement may be used to satisfy requirements for major options that require a senior thesis. Courses taken as part of the CDS minor are counted toward the total 486-unit Institute graduation requirements.

A typical course sequence would be to take either CDS 110 ab or CDS 140 ab in the junior year, followed by the remaining

course and the senior thesis in the senior year. Alternatively, it is possible to take all requirements in the senior year. In addition to the requirements above, CS 1 and CS 2 are highly recommended.

Economics Option

The economics option provides students with an understanding of the basic principles underlying the functioning of economic institutions. It offers a modern and quantitative approach to economics seldom available to undergraduates. The emphasis on economic principles and modern methodology provides students with an excellent preparation for graduate study in economics or for professional study in the fields of business or law and economics.

The option is sufficiently flexible that students can combine their pursuit of economics with studies in other areas, such as engineering, physics, or mathematics. The core of the option consists of Ec 11, Ec 121, Ec 122, and Ec 123. Students are strongly encouraged to supplement this core with additional electives in economics, political science, and mathematics.

Option Requirements

1. Ec 11, Ec 121 ab, Ec 122, BEM/Ec/SS 20.
2. Ma 112 a.
3. Ec 105 or Ec 145.
4. Ec 123 or Ec 140.
5. 54 additional units of advanced economics and social science courses. (Courses that are used to fulfill the Institute advanced social science requirement [courses numbered 100 and above] will also count toward the 54 additional units required under the economics and social science options.) Students may also take classes from the following list in partial fulfillment of this requirement: any BEM course except BEM 101; ACM 113, ACM 116, or ACM/ESE 118 .
6. 45 additional units of science, mathematics, and engineering courses. The requirement cannot be satisfied by courses listed as satisfying the introductory laboratory requirement or by any course with a number less than 10.
7. Passing grades must be earned in a total of 486 units, including all courses used to satisfy the above requirements.

Electrical Engineering Option

The main objective of the electrical engineering program is to prepare its students for either graduate study or research and development work in government or industrial laboratories. This objective is consistent with the Institute's mission since 1921 (as quoted on page 9). It accomplishes this by building on the core curriculum to provide a broad and rigorous exposure to the fundamentals (e.g., math, science, and engineering) of electrical engineering. EE's other program objectives are multiple. The program strives to maintain a balance between classroom lectures and laboratory and design experience, and emphasizes the problem-formulation, system-design, and solving skills that are essential to any engineering discipline. The program also strives to develop in each student self-reliance, creativity, teamwork ability, professional ethics, communication skills, and an appreciation of the importance of contemporary issues and lifelong intellectual growth.

Students electing this option will normally choose to take APh/EE 9 as a freshman-year elective. Freshmen interested in digital electronics might also consider taking EE/CS 51. Then, in the sophomore year, the formal study of electrical engineering will begin with semiconductor sensors and actuators, EE 40, and then the theory and laboratory practice of analog and digital electronics, EE 45 and EE/CS 51/52, respectively. The junior year features EE 111; a course on feedback control systems, EE 113 or CDS 110 a; an introduction to analog and digital communications, EE 160; and an analog electronics laboratory, EE 90. In the senior year, the student will take electromagnetic engineering, EE 151, and will also be asked to demonstrate his or her ability to formulate and carry out a design project through independent research or either a senior thesis, EE/CS 80 abc, or two courses selected from the senior project design laboratory, EE 91 ab, EE/CS 53, and CS/EE/ME 75 c. In addition, the student, especially in the senior year, will have a significant opportunity to take elective courses that will allow him/her to explore earlier topics in depth, or to investigate topics that have not been covered previously. (See the "suggested electives" section, page 204.)

A student whose interests lie in the electrical sciences but who wishes to pursue a broader course of studies than that allowed by the requirements of the electrical engineering option may elect the engineering and applied science option.

Attention is called to the fact that any student who has a grade-point average less than 1.9 at the end of the academic year in the subjects listed under electrical engineering may be refused permission to continue work in this option.

Option Requirements

1. APh/EE 9 ab.
2. ACM 95 abc.
3. EE 40, 45, 111, 151, 160, and either EE 113 or CDS 110 a.
4. EE/CS 51, EE/CS 52, EE 90.
5. EE 80 abc, or two courses selected from EE 91 a, EE 91 b, EE/CS 53, and CS/EE/ME 75 c (note that only CS/EE/ME 75 c may replace one term of EE 91 and EE/CS 53).
6. E 10 and E 11.
7. In addition to the above courses, 27 units selected from any EE course numbered over 100, or any cross-listed courses numbered over 100 that include EE in the listing.
8. Passing grades must be earned in a total of 486 units, including courses listed above.

Typical Course Schedule¹

		18	12	36
		39	42	45

¹ A student who follows this “typical schedule” exactly, and who takes APH/EE 9 ab as a freshman, will have taken more than 500 units prior to graduation, whereas only 486 are required. This means that by taking fewer electives than given in the typical schedule, the student can take lighter loads and have considerable flexibility in arranging his or her individual schedule.

² See Institute requirements for specific rules regarding humanities and social sciences.

³ See option requirement 5.

Suggested Electives

First-year students interested in electrical engineering should take APH/EE 9 ab, which is an EE option requirement (though it need not be taken freshman year).

Suggested elective courses for the second, third, and fourth year for various specializations within electrical engineering are given below. Students interested in other areas of specialization or interdisciplinary areas are encouraged to develop their own elective program in consultation with their faculty adviser.

Bioengineering

Second Year: BE/Bi 105, Bi 9, Bi 10, APH 17 abc

Third and Fourth Year: Bi/Ch 110, Bi/Ch 113, BE 141, EE/BE 166, EE/BE 185, CNS/Bi/EE 186, CNS/CS/EE 188.

Communications and Signal Processing

Second Year: Selected from APH 17 abc, APH 23, APH 24, EE/CS 53

Third and Fourth Year: EE 112, ACM/EE 116, EE/Ma 126 ab, 127 ab, EE 128 ab, 161, 163 ab, 164, 167, EE/APH 131, APH/EE 130, 132, and selections from EE/CS 54, Ma 112 a.

Control

Second Year: APH 17 abc

Third and Fourth Year: CDS 110 ab, and selections from EE 112, ACM/EE 116, EE 128 ab, EE 164.

Electronic Circuits

Second Year: EE 113, CDS 101, APH/EE 183 ab

Third and Fourth Year: EE 114 ab, 124, 125, 153, CS/EE 181 abc, and selections from EE 112, CS 185 abc, EE/APH 180, EE 119, EE 160, EE 128 ab.

Microwave and Radio Engineering

Second Year: APH 23, APH 24, APH 17 abc

Third and Fourth Year: EE 153, EE/Ae 157 ab, EE 114 ab, EE/APH 131, APH/EE 130, 132, APH/EE 183 ab.

Optoelectronics

Second Year: APH 23, APH 24, APH 17 abc

Third and Fourth Year: APH/EE 130, 132, APH 105 abc, APH 114 abc, APH/EE 183 ab, APH 190 abc, EE/APH 131, EE 153.

Solid-State Electronics and Devices

Second Year: APH 17 abc

Third and Fourth Year: APH/EE 183 ab, and selections from APH 105 abc, APH 114 ab, EE 153, EE/BE 185, EE 187.

Engineering and Applied Science Option

The engineering and applied science (EAS) option offers students the opportunity for study in a wide variety of challenging areas of science and technology and includes concentrations in computation and neural systems, environmental science and engineering, and materials science. In addition, the EAS option offers students the possibility of designing a customized course of study that has breadth, depth, and rigor similar to the concentrations listed above.

The aim of the EAS option is to prepare students for research and professional practice in an era of rapidly advancing interdisciplinary technology. The program builds on the core curriculum to combine individual depth of experience and competence in a particular chosen engineering specialty, and a strong background in the basic and engineering sciences, with laboratory and design culminating in a capstone design experience. It strives to develop professional independence, creativity, leadership, and the capacity for continuing professional and intellectual growth.

The first year of the four-year course of study leading to a Bachelor of Science degree is common for all students of the Institute, although freshman elective subjects are available as an introduction to various aspects of engineering and applied science. At the end of the first year, students who elect the EAS option are assigned advisers as close to their expressed field of interest as possible, and together with their advisers develop programs of study for the next three years. Beyond the Institute-wide requirements of physics, mathematics, and humanities, the EAS option requires one year of applied and computational mathematics and a prescribed number of units selected from a wide variety of engineering and applied science courses. Engineering design (synthesis), as distinct from analysis, is considered an essential part of every engineer's capability. Advisers will expect students to select a sufficient number of courses that place emphasis on design.

Any student in the EAS option whose grade-point average is less than 1.9 at the end of the academic year in the subjects listed in the option requirements may be refused permission to continue to work in the EAS option.

Option Requirements

Students who have elected the EAS option must either choose one of the approved areas of concentration (see item 6 a below), or by the end of the third term of the sophomore year submit a written proposed customized course of study and obtain approval for it from the EAS option oversight committee (see item 6 b below).

The course of study must include each of the following elements:

1. Demonstration of computer programming competency by taking CS 1, or by taking an approved alternative course, or by passing a placement exam administered by the computer science option by first term of sophomore year.
2. a. 27 units of advanced EAS courses with the prefixes Ae, ACM, AM, APh, BE, CE, CNS, CS, CDS, EE, ESE, MS, or ME;

and

- b. 27 additional units of either advanced EAS courses or advanced science courses offered by the Biology, CCE, GPS, or PMA divisions.
3. a. 9 units of laboratory courses taken from the following list: APh 77 bc, Ae/APh 104 bc, CE 95, CE 180, CS 47, CS 134 b, CS/CNS 171, 173, and 174, EE 45, EE/CS 52, 53, 54, EE 90, EE 91 ab, ESE 159, MS 90, MS 125, ME 72 ab, ME 90 bc, ME 96;

and

- b. 9 units of additional laboratory courses either from the list in 3 a or from EAS courses with the word “laboratory” in the title, but excluding those courses for which freshman laboratory credit is allowed.
4. ACM 95 abc or Ma 108 abc or Ma 109 abc. None of these course sequences may be taken pass/fail.
5. E 10 or equivalent; E 11 or equivalent.
6. Courses used to satisfy requirements 1–5 above must also satisfy a depth requirement, which must be met by either:
 - a. the concentration requirements listed below for one of the following disciplines: computation and neural systems, environmental science and engineering, and materials science

or

- b. a customized schedule of requirements that is similarly rigorous to 6 a, has both breadth and depth, and that includes a senior thesis or capstone design project, such as, but not restricted to EE/CS 80 abc, ME 90 abc, or two terms chosen from EE 91 ab and EE/CS 53. To select this alternative, the student must submit a written proposal to, and obtain the approval of, the EAS option oversight committee. This approval must be obtained by the end of the third term of the sophomore year.

(Note: Students who meet the depth requirement by satisfying one of the five concentration requirements listed in 6 a will have both the EAS option and the name of the concentration listed on their transcript while students who satisfy the depth requirement using 6 b will have only the EAS option listed on their transcript.)

7. At least 117 units of EAS courses not including those used to satisfy requirements 3, 4, and 5 above. Concentrations marked with a dagger (†) in the list below include sufficient EAS courses to automatically satisfy this requirement; concentrations marked with an asterisk (*), and also the customized schedule given in 6 b, do not do so, in which case students will have to select sufficient additional EAS courses to bring the total to 117 units. Courses in ChE count toward this requirement.
8. All concentrations and the customized schedule of requirements described in 6 b shall include a major design experience.
9. Passing grades must be earned in at least 486 units, including those listed in requirements 1–8 above.

Discipline Concentration Requirements (to satisfy requirements 6 a and 8 above)

*Computation and Neural Systems**

CNS 100, Bi/CNS 150, CNS/Bi/Ph/CS 187, CNS/Bi/EE 186, CNS/CS/EE 188 (or IST 4), EE 111, CDS 101, Bi 8 (or Bi 9). CS 2 is required in addition to CS 1 for the CNS concentration. In addition, the laboratory course Bi/CNS 162 is required. The project for CNS/Bi/EE 186 shall be organized as a design project drawing on the ensemble of CNS disciplines.

Environmental Science and Engineering†

Thermodynamics (ChE 63 ab or ME 18 ab), transport processes (ChE 103 abc or ME 19 ab), environmental laboratory (ESE 159); a total of 4 courses covering all three of the areas of environmental chemistry (ESE 142, ESE/Ge/Ch 171, 172, or ESE/Ch/Ge 175), environmental physics (ESE/Ge 148 a, ESE/Ge 148 b, or ChE/ESE 158), and environmental biology (ESE/Ge 148 c, ESE/Bi 166, or ESE/Bi 168); ESE 90 (senior thesis) 18 units. ESE 159 satisfies requirement 8. Substitution of courses may be approved at the discretion of the concentration representative, provided they meet the overall EAS requirements.

Materials Science†

APh 17 ab or ChE 63 ab or ME 18 ab, MS 115 ab, MS 90, and three terms of MS 78 (senior thesis, which includes a major design experience). In addition, the student shall complete 45 units from the following list of restricted electives: ME 35 abc, APh 105 abc, APh 114 abc, APh/EE 130, APh/EE 183, Ch 120 ab, Ch 121 ab, Ch 125 abc, Ch/ChE 147, ChE/Ch 148, CS 11, Ge 114 ab, MS 105, MS 125, MS 130–133, MS 142, Ph 125 abc. Substitution of

courses may be approved at the discretion of the concentration representative, provided they meet the overall EAS requirements.

English Option and Minor

The option in English provides students with a broad education in English and American literatures, their historical contexts, and different approaches to their study. During the senior year, English majors will enroll in En 99 ab with a faculty member chosen by mutual agreement. En 99 a is devoted to research and En 99 b to writing a substantial research paper. This paper provides the most important means for evaluating a major's progress in the rigorous study of English. The English option provides excellent preparation for students seeking careers in law, business, administration, and medicine. The emphasis on writing critical essays helps scientists and engineers develop the communication skills necessary for success in their fields.

All students are assigned an adviser who will help them select the courses best suited to their needs, including courses in fields such as history that may be relevant for work in the English option. Students will be expected to consult their adviser before registering for each quarter's work. It is recommended that English majors take at least one English or related course per term. Those who are preparing for graduate work in English should take more than the minimum requirements listed below, and should be pre-

pared to take courses in several periods of English and American literature. All courses to be counted toward the option in English must be taken for grades except for Hum/En 5 or Hum/En 6 when taken in the first two quarters of the freshman year.

Option Requirements

1. En 99 ab and one term of En 114.
2. 81 additional units of English courses numbered 99 and above. Up to nine units of Hum/En 5 or Hum/En 6 and/or up to nine units of En 98 may be substituted for up to 18 of these units. Students may also substitute courses in foreign literature (in the original or in translation) and/or, with authorization of the adviser, related humanities courses numbered above 99, for up to 18 units of English courses.
3. 54 additional units of science, mathematics, and engineering courses. This requirement cannot be satisfied by courses listed as satisfying the introductory laboratory requirement or by a course with a number less than 10.
4. Passing grades must be earned in a total of 486 units, including the courses listed above.

210

English Minor Requirements

The English minor is designed for students who want to pursue concentrated study in English and/or American literature, without the extensive course work and the senior thesis required by the English option.

English minors must take 72 units of English courses. These units may include one freshman humanities course; they may also include one directed reading course (En 98). Students wishing to do a minor in English must declare a minor with the English option representative. Students completing the English minor requirements will have the phrase “minor in English” added to their transcripts.

1. 72 units of English courses numbered 99 or above.
2. Nine units of Hum/En 5 or Hum/En 6 may be substituted for any nine of the 72 units required for the minor.
3. Nine units of En 98 may be substituted for any nine of the 72 units required for the minor.

Geology, Geobiology, Geochemistry, Geophysics, and Planetary Science Options

The aim of this undergraduate program is to provide thorough training in the geological and planetary sciences and, wherever possible, to integrate these studies with, and build upon, the courses in mathematics, physics, chemistry, and biology taken during the student's earlier years at the Institute. Active involvement in research, particularly during the summer, is encouraged. For geologists, field work is emphasized because it provides firsthand expe-

rience with geological phenomena that can never be satisfactorily grasped or understood solely from classroom or laboratory treatment. Options are offered in geology, geobiology, geochemistry, geophysics, and planetary science. Electives permit students to follow lines of special interest in related scientific and engineering fields. Those who do well in the basic sciences and at the same time have a compelling curiosity about the earth and the other planets are likely to find their niche in these options, especially if they enjoy grappling with complex problems involving many variables. Most students majoring in the earth and planetary sciences now pursue further training at the graduate level.

Under the geobiology option a student can be associated with either Biology or GPS. This association formally will only affect which course the students elect to satisfy the Institute-wide oral presentation requirement; all other geobiology option requirements are independent of GPS or Biology affiliation. In practice, however, we expect that students' affiliation with one division or another will significantly shape their choice of elective courses.

For students beginning their junior year, it is possible to complete the requirements for geochemistry, geophysics, and planetary science options within two years, but there are benefits from starting with the Ge 11 sequence in the sophomore year. Because Ge 120 may not be offered every year, students in the geology option may also need to take Ge 106 ab in their sophomore year in order to prepare for Ge 120 the following summer.

Passing grades must be earned in a total of 486 units, including courses listed below. Any student whose grade-point average in science and mathematics courses is less than 1.9 at the end of an academic year may be refused permission to register in the geological and planetary science options.

Option Requirements Geology Option Requirements

1. Ge 11 ab, Ge/Ay 11 c or Ge 11 d, Ge 13, 109.
2. ACM 95 abc or (Ch 41 abc and Ge 108) or (Ch 21 abc and Ge 108).
3. Ge 106 ab, 112 a, 114 ab, 115 abc, 120.
4. Ge 116 and 111 ab, or Ge 112 b and Ge 11 d¹.
5. 15 units of elective courses in Ge or cross-listed with Ge.

¹ If Ge 11 d is used to satisfy requirement 4, students must take Ge 11 c to satisfy requirement 1.

History Option and Minor

The history option allows students to study past societies and their development in more depth than can be done within the limits of the Institute humanities requirements. With the guidance of a faculty member in history, students taking the option explore the range of human experience, in the realms of politics, culture, religion, and economics, that lies outside the realm of science and technology. They also learn the critical reading and thinking skills, and the facility in writing, that are central to the historical enterprise. The history option thus provides students with an important supplement to the scientific training and technical skills they acquire in other courses and options. In addition, it offers excellent preparation for careers in business, administration, law, journalism, or public affairs, as well as a solid foundation for graduate work in history.

History majors must take at least 99 units of history courses (including freshman humanities) during their four years as undergraduates. Of these, 27 must be in the senior tutorial (H 99 abc).

Each history major will choose an area of concentration in consultation with his or her adviser and the history option representative. These areas might include, but are not restricted to, fields such as ancient history, medieval Europe, early-modern Europe, modern Europe, Russian history, American history pre-1865, American history post-1865, early-modern history of science, modern history of science, or economic history. He or she must take 63 units of courses in this area; 27 of these units must be in the senior tutorial H 99 abc. The senior tutorial will culminate in a research paper.

Each student must take the remaining 36 units of history required by the option in areas other than the area of concentration, again defined in consultation with his or her adviser and the history option representative. These areas may include not only fields within the discipline of history proper, but also useful cognate fields such as economics, political science, anthropology, law, English, or a foreign language.

A student considering the history option when he or she comes to Caltech will be well advised to take one course from Hum/H 1, 2, 3, or 4. In the sophomore year, the student should take upper-level history courses, but this is also a good time to pursue the study of English or philosophy, to begin or continue a foreign language, and to do introductory work in the social sciences. A student will normally make a commitment to an area of concentration early in the junior year. At the beginning of the senior year, a history major will enroll in H 99 abc with a faculty member in his or her area of concentration. The first term of this course will be devoted to preparation, the second to research, and the third to the writing of a substantial research paper.

Option Requirements

1. H 99 abc.
2. 72 additional units of history courses numbered 99 or above. Up to nine units of Hum/H 1, 2, 3, or 4 and/or up to nine units of H 98 may be substituted for up to 18 of these units.
3. 63 of the total history units, including H 99 abc, must be in an area of concentration, as defined in consultation with the student's adviser and the history option representative.
4. 36 of the total history units must be in an area or areas other than the area of concentration, as defined in consultation with the student's adviser and the history option representative. H 99 abc may not be used to fulfill this requirement.
5. 54 additional units of science, mathematics, and engineering courses. This requirement cannot be satisfied by courses listed as satisfying the introductory laboratory requirement or by menu courses.
6. Three units of oral communication. En 84 satisfies this requirement, as do oral communication courses offered by other options.
7. Passing grades must be earned in a total of 486 units, including the courses listed above.

History Minor Requirements

The history minor is designed for students who want to pursue concentrated study in history without the extensive course work and the senior thesis required by the history option.

History minors must take 72 units of history courses. These units may include one freshman humanities course; they may also include one directed reading course (H 98). Students wishing to do a minor in history must declare a minor with the history option representative. Students completing the history minor requirements will have the phrase "minor in history" added to their transcripts.

1. 72 units of history courses numbered 99 or above.
2. Nine units of Hum/H 1, 2, 3, or 4 may be substituted for any nine of the 72 units required for the minor.
3. Nine units of H 98 may be substituted for any nine of the 72 units required for the minor.

History and Philosophy of Science Option and Minor

The option in history and philosophy of science (HPS) provides students with a broad education in the historical and philosophical issues arising in connection with science and technology. Students take courses addressing fundamental questions about scientific concepts and practice, such as the following: To what extent was the scientific revolution revolutionary? What is a scientific explanation and how do scientists go about constructing and justifying one?

How have conceptions of scientific experimentation changed over time? How and why did modern physics (or chemistry or biology) emerge in the form that it did? How should the theory of evolution inform our conception of the modern mind and brain? What role can the neurosciences be expected to play in solving the “mind-body” problem? The option thus aims to give students a broad basic understanding of the ways in which science is practiced and the ways in which that practice has changed over time. It is designed to complement the regular curriculum at Caltech, offering students the opportunity to enlarge upon and to contextualize the strong technical skills they acquire in other courses and options.

The HPS option provides excellent preparation for students going into law, business, medicine, and public affairs, as well as solid preparation for graduate work in the history and/or philosophy of science. In addition, and because of its emphasis on essay writing and the formulation of complex philosophical and historical arguments, it aids budding scientists and engineers in developing the writing and communication skills that are increasingly vital today.

218

Option Requirements

1. Hum/H/HPS 10, HPS 102 ab, HPS/PI 120, and HPS 103 (normally for 9 quarters). HPS 102 b fulfills the Institute scientific writing requirement.
2. Three advanced courses in the history of science, chosen from HPS/H offerings with a course number of 98 or higher (see note 2).
3. Three advanced courses in philosophy of science, chosen from HPS/PI offerings with a course number of 98 or higher (see note 2).
4. 45 units of courses in science, mathematics, and engineering. This requirement cannot be satisfied by courses listed as satisfying the introductory laboratory requirement or by a course with a number less than 10.
5. Passing grades must be earned in a total of 486 units, including all courses used to satisfy the above requirements.

Explanatory Notes

1. It is desirable that students enter the option in their sophomore year. However, students may also enter the option in their junior year if they can complete the option’s requirements in time for graduation.
2. No more than nine units of HPS 98 may be counted toward the HPS major.

Typical Course Schedule

First Year

It is recommended that students intending to follow the HPS option take Hum/H/HPS 10 as one of their freshman humanities courses. Students making the decision to take this option in their sophomore year should take Hum/H/HPS 10 and HPS/PI 120 as early as possible in that year.

219

Note: Not all required courses are offered each term; students should consult the current Catalog to determine which terms required courses are being offered, and should construct their course plan for the year accordingly.

¹ If not taken in first year, otherwise one additional HPS or elective.

² It is recommended that students choose their advanced social science electives from among courses that will enlarge their perspective on topics related to HPS (e.g., Ec/SS 129, Ec/SS 130, Psy 101, Psy 125, Psy/CNS 130, PS 120, PS 121, PS 122, An 22).

³ HPS 102 ab may be taken in any two consecutive terms in the senior year. Students should coordinate with their HPS adviser to determine their course schedule.

History and Philosophy of Science Minor Requirements

The minor in history and philosophy of science (HPS) is designed for students who want to pursue concentrated study in HPS without the extensive course work and the senior thesis required by the HPS option.

HPS minors must complete 72 units of HPS courses. These may include Hum/H/HPS 10 and up to nine units of advanced reading in HPS (HPS 98). Freshman humanities courses other than Hum/H/HPS 10 may not be counted toward an HPS minor. Students wishing to do a minor in HPS must declare a minor with the HPS option representative. Those completing the HPS minor requirements will have the phrase “minor in history and philosophy of science” added to their transcripts.

1. 72 units of HPS courses numbered 99 or above.
2. Nine units of HPS 98 may be substituted for any nine of the 72 units required for the minor.
3. Nine units of Hum/H/HPS 10 may be substituted for any nine of the 72 units required for the minor.

220

Independent Studies Program

The Independent Studies Program (ISP) is an undergraduate option that allows the student to create his or her own scholastic requirements, under faculty supervision, and to pursue positive educational goals that cannot be achieved in any of the other available options. A student's program may include regular Caltech courses, research courses, courses at other schools, and independent study courses (item 5 next page). In scope and depth, the program must be comparable to a normal undergraduate program, but it need not include all of the specific courses or groups of courses listed in the formulated Institute requirements for undergraduates.

The Curriculum Committee, a standing committee of the faculty, has overall responsibility for the program. In addition, each student has his or her own committee of three advisers, two of whom must be professorial faculty. Application material may be obtained at the Registrar's Office or from the dean of students.

Administrative Procedures and Guidelines

1. An interested student must recruit three individuals, representing at least two divisions of the Institute, who approve of his or her plans and agree to act as an advisory “committee of three.” The committee of three forms the heart of the program and bears the chief responsibility for overseeing the student's progress. The chair and one other member must be on the professorial staff. The third member may be any qualified individual, such as a postdoctoral fellow, graduate student, or faculty member of another institution.
2. The student must submit a written proposal to the dean of stu-

dents, endorsed by the committee of three, describing his or her goals, reasons for applying, and plan of study for at least the next year. If persuaded that the proposal is sound and workable, the dean endorses it and passes it on to the Curriculum Committee. This committee, in turn, reviews the proposal and, if it is acceptable, assumes responsibility for oversight of the program.

3. To implement the program, a written contract is now drawn up between the student, the committee of three, and the Curriculum Committee. This contract includes the agreed-upon content of the student's program and the methods for ascertaining satisfactory progress for those parts of the student's program that are not standard Institute courses. This contract may of course be amended, but any amendments must be approved by the committee of three and the Curriculum Committee. Copies of each student's contract and of all amendments thereto, along with all ISP records for each student and his or her transcript, are kept in the permanent files of the Registrar's Office. Passing grades must be earned in a total of 486 units.
4. The progress of each student in the ISP is monitored each quarter by the registrar, and any deviations from the terms of the contract are reported to the Chair of the Curriculum Committee. Standards for acceptable progress and for satisfactory completion of the terms of the contract are the responsibility of the Curriculum Committee. When the Committee is satisfied that the terms of the contract have been fulfilled by the student, it recommends the student to the faculty for graduation.
5. A plan of study may include special ISP courses to accommodate individual programs of study or special research that falls outside ordinary course offerings. In order that credit be received for an ISP course, a written course contract specifying the work to be accomplished, time schedule for progress reports and completed work, units of credit, and form of grading must be agreed upon by the instructor, the student, and the committee of three, and submitted to the registrar prior to initiating the work in the course. ISP courses are recorded on the student's transcript in the same manner as are other Caltech courses.

221

Mathematics Option

The four-year undergraduate program in mathematics leads to the degree of Bachelor of Science. The purpose of the undergraduate option is to give students an understanding of the broad outlines of modern mathematics, to stimulate their interest in research, and to prepare them for later work, either in pure mathematics or allied sciences. Unless students have done very well in mathematics

courses in their freshman and sophomore years, they should not contemplate specializing in mathematics.

Since the more interesting academic and industrial positions open to mathematicians require training beyond a bachelor's degree, students who intend to make mathematics their profession must normally plan to continue with graduate study. Some students use their background in mathematics as an entry to other fields such as physics, computer science, statistics, economics, business, finance, medicine, or law.

The schedule of courses in the undergraduate mathematics option is flexible. It enables students to adapt their programs to their needs and mathematical interests and gives them the opportunity to become familiar with creative mathematics early in their careers. In particular, students are encouraged to consider courses in areas such as applied and computational mathematics, physics, finance, economics, control and dynamical systems, computer science, electrical engineering, and computation and neural systems.

During each term of their junior and senior years, students normally take 18 units of courses in mathematics or applied and computational mathematics, including the required courses Ma 108 abc and 109 abc. Any course listed under applied and computational mathematics is regarded as an elective in mathematics and not as an elective in science, engineering, or humanities. Those who have not taken Ma 5 as sophomores must do so as juniors. Overloads in course work are strongly discouraged; students are advised instead to deepen and supplement their course work by independent reading.

A student whose grade-point average is less than 1.9 at the end of the academic year in the subjects under mathematics and applied and computational mathematics may, at the discretion of the department, be refused permission to continue work in the mathematics option.

Option Requirements

1. Ma 5 abc, Ma 10, Ma 108 abc, Ma 109 abc.
2. Ma/CS 6 a or Ma 121 a.
3. Ma/CS 6 c or Ma 116 a or Ma/CS 117 a.
4. 45 additional units in Ma or ACM numbered 90 or above (other than Ma 98). Courses in other options with high mathematical content may be used to fulfill this requirement with the approval of the executive officer for mathematics. Of these 45 units, at most 18 can be in ACM or other courses outside Ma.
5. Math majors must take two quarters (18 units) of a single course, chosen from the Ma course listings with numbers between 110 and 190, inclusive. (In years where one of these courses is given as a one-term course only, it cannot be used to satisfy this requirement.) These two quarters may be used to meet requirements 2, 3, or 4.

6. Unlike courses satisfying requirements 4 and 5, which may be taken pass/fail, none of the courses satisfying requirements 1–3 may be taken on a pass/fail basis.
7. Passing grades must be earned in a total of 483 units, including the courses listed above.

Typical Course Schedule

		<i>Units per term</i>		
		<i>1st</i>	<i>2nd</i>	<i>3rd</i>
<i>Second Year</i>				
Ma 2 ab	Sophomore Mathematics	9	9	-
Ph 2 ab	Sophomore Physics	9	9	-
Ma 5 abc	Introduction to Abstract Algebra	9	9	9
	HSS Electives	9	9	9
	Electives ¹	9	9	27

		<hr/>	<hr/>	<hr/>
		45	45	45

¹ Includes menu course (second year; if not taken in freshman year). Also must include courses to meet option requirements 4, 5.

Mechanical Engineering Option

The objective of the undergraduate program in mechanical engineering at Caltech is to prepare and inspire students for careers that lead to top positions in academia, industry, and government in areas related to fluid, solid, thermal, and mechanical systems. Specifically, the objective is to prepare students for graduate school and for professional practice in an era of rapidly advancing interdisciplinary technology.

To attain these objectives, the program builds on Caltech's core curriculum to combine individual depth of experience and competence in a particular chosen mechanical engineering specialty, with a strong background in the basic and engineering sciences. It maintains a balance between classroom lectures and laboratory and

design experience, and emphasizes the problem-formulation and solving skills that are essential to any engineering discipline. The program also strives to develop in each student self-reliance, creativity, leadership, professional ethics, and the capacity for continuing professional and intellectual growth. For interested students, there are opportunities to conduct research with a faculty member.

The outcome of the undergraduate program is to prepare the student to build on a fundamental education in physics, mathematics, chemistry, and biology and to apply those principles to the solution of open-ended engineering problems; to design, analyze, measure, and evaluate fluid, thermal, and mechanical systems; to work effectively as part of a team; to communicate effectively; to apply ethical considerations; and to understand the broader implications of engineering developments, including societal, cultural, and environmental impacts.

Mechanical engineering is the branch of engineering that is generally concerned with understanding forces and motion and their application to solving problems of interest to society. The field includes aspects of thermodynamics, fluid and solid mechanics, mechanisms, materials, and energy conversion and transfer, and involves the application of physics, mathematics, chemistry, and increasingly biology and computer science. Importantly, the field also emphasizes the process of formulation, design, optimization, manufacture, and control of new systems and devices.

Technical developments in the last decade have established the importance of interdisciplinary engineering and science, and as a result, new technical disciplines within mechanical engineering have emerged. These new areas build on an understanding of the fundamental behavior of physical systems; however, the focus of this work is at the interfaces of the traditional disciplines. Examples of the new disciplines include micro- and nanomechanical systems, simulation and synthesis, integrated complex distributed systems, and biological engineering.

Mechanical engineers can be found in many fields, including automotive, aerospace, materials processing and development, power production, consumer products, robotics and automation, semiconductor processing, and instrumentation. Mechanical engineering can also be the starting point for careers in bioengineering, environmental and aeronautical engineering, finance, and business management.

At the end of the first year, students who elect the mechanical engineering option are assigned advisers as close to their expressed field of interest as possible, and together they develop programs of study for the next three years. Beyond the Institute-wide requirements of physics, mathematics, and humanities, these programs require one year of applied and computational mathematics and additional course requirements listed below.

A student whose interests relate to mechanical engineering, but who wishes to pursue a broader course of study than that allowed

by the requirements below, may elect the engineering and applied science option.

Attention is called to the fact that any student whose grade-point average is less than 1.9 at the end of the academic year in the required courses listed below may be refused permission to continue work in this option.

Option Requirements

1. E 10, E 11.
2. ACM 95 abc or ACM 101 abc.
3. 9 units from ACM 11, CS 1, CS 2, CS 11, EE/CS 51, Ph 20–22.
4. ME 35 abc, 18 ab, 19 ab, 71, 65 or MS 115 b, and CDS 110 a.
5. 9 units of ME 96 and 9 units of additional engineering laboratory¹ (such as CS/EE/ME 75 abc, MS 90, ME 72 b), or an experimental senior thesis (ME 90 abc).
6. In addition to the above courses, 27 units selected from Ae/APh/CE/ME 101 abc, Ae/AM/CE/ME 102 abc, Ae/ME 120 ab, AM/CE 151 abc, CDS 110 b, CDS 140, EE/BE 185, E/ME 103, E/ME 105, ME 20, 66, 72 a (only if ME 72 b is completed), 90 abc, 91 abc, 115 ab, 118, 119 ab, 171, MS 115 a, or an advanced engineering course approved in advance by the mechanical engineering faculty.
7. A design project. This requirement may be fulfilled by taking one of the following: ME 72 ab, E/ME 105, CS/EE/ME 75 abc. When appropriate, students may also seek consent from the ME undergraduate option representative and the student's adviser to fulfill this requirement by taking ME 90 abc, ME 91 abc, or another suitable project course. If ME 72, CS/EE/ME 75 abc, or ME 90 is chosen, these units may also be used to fulfill requirement 5.
8. None of the courses satisfying requirements 2 through 7 may be taken pass/fail.
9. Passing grades must be earned in a total of 486 units, including courses listed above.

¹ Excluding courses for which freshman laboratory credit is allowed.

Typical Course Schedule

		Units per term		
		1st	2nd	3rd
<i>Second Year</i>				
Ma 2 ab	Sophomore Mathematics	9	9	-
Ph 2 ab	Sophomore Physics	9	9	-

		<hr/>	<hr/>	<hr/>
		48	36	36

Suggested Electives

Elective courses for the third and fourth year should be selected in consultation with the student's faculty adviser to pursue an interdisciplinary topic or a specialization of interest to the student. Such specializations include micro- or nanomechanical systems, simulation and synthesis, integrated complex distributed systems, kinematics, dynamics, fluid mechanics, solid mechanics, mechanical systems, control systems, engineering design, thermal systems, energy systems, combustion, or biological engineering.

Philosophy Option and Minor

The philosophy option provides students with a broad education in philosophy. The courses in the philosophy option concentrate in four major areas: philosophy of science; philosophy of mind, brain, and behavior; history of philosophy; and moral and political philosophy. The option is designed to complement the scientific curriculum at Caltech, to provide students with new perspectives on the material they learn in their science courses, and to enable them to bring their technical skills and scientific learning to traditional problems in philosophy. In addition, the philosophy option focuses on the development of rigor in argument, as well as clarity in written and oral communication. The philosophy curriculum will provide interested students with a solid foundation for graduate work in philosophy. In addition, the analytical and communication skills learned in the philosophy option provide an excellent foundation for careers in law, business, medicine, and scientific research.

Philosophy majors must take at least 99 units of philosophy courses during their four years as undergraduates. These must include 18 units of PI 90 ab, to be taken in any two consecutive terms in the senior year. The 99 units may include nine units of

either Hum/PI 8 or Hum/PI 9, nine units of PI 98, and up to 18 units of study in related disciplines.

Depending on their interests, philosophy majors may be required by the option representative or their advisers to take up to 18 units in one or more related areas. For example, students writing on political philosophy or philosophy of neuroscience will be expected to have the appropriate political science or neuroscience background. Students whose primary interest lies in the philosophy of science—particularly in the philosophy of particular sciences such as physics or biology—will have their intellectual interests best served by taking classes in both the history and philosophy of science. Such students are encouraged to pursue the HPS option; or, if they choose the philosophy option, they may be required to take some history of science courses toward their 99-unit requirement.

Students considering the philosophy option will be well advised to take either Hum/PI 8 or Hum/PI 9 as one of their freshman humanities courses. From the sophomore year onward, they should plan on taking one philosophy course per term, culminating in two terms of PI 90 ab in the senior year. Students in PI 90 ab work with a faculty adviser to write a 10,000–12,000 word paper on a topic of mutual interest. Senior theses are expected to be of a high standard and to form the basis of students' applications to graduate study in philosophy, should they so desire.

Option Requirements

1. PI 90 ab.
2. 63 units of advanced philosophy courses, numbered 99 or above. (Up to nine units of Hum/PI 8 or Hum/PI 9 and/or up to nine units of PI 98 may be substituted for up to 18 of these advanced units.)
3. 18 units of advanced philosophy courses numbered 99 or above, or advanced non-philosophy courses that are closely related to the student's area(s) of philosophical interest. (Students wishing to count non-philosophy courses toward their option requirements must obtain prior approval from the philosophy option representative or their adviser. Students will normally not be permitted to satisfy this requirement with core courses.)
4. 54 units of science, mathematics, and engineering courses in addition to the core. This requirement cannot be satisfied by core or menu courses, or by courses listed as satisfying the introductory laboratory requirement. Students are strongly encouraged to choose their additional courses in areas that complement their philosophy studies.
5. Passing grades must be earned in a total of 486 units, including the courses listed above.

Philosophy Minor Requirements

The minor in philosophy is designed for students who want to pursue concentrated study in philosophy without the extensive course work and the senior thesis required by the philosophy option.

Philosophy minors must complete 72 units of philosophy courses. These units may include nine units of Hum/PI 8 or Hum/PI 9 and/or nine units of reading in philosophy (PI 98). Students wishing to do a minor in philosophy must declare a minor with the philosophy option representative. Students completing the philosophy minor requirements will have the phrase “minor in philosophy” added to their transcripts.

1. 72 units of philosophy courses numbered 99 or above.
2. Nine units of PI 98 may be substituted for any nine units of the 72 required for the minor.
3. Nine units of either Hum/PI 8 or Hum/PI 9 (not both) may be substituted for any nine units of the 72 required for the minor.

Physics Option

The physics option offers instruction in the fundamentals of modern physics and provides a foundation for graduate study, which is generally necessary for a career in basic research. Many individuals have also found that the physics program forms an excellent basis for future work in a variety of allied fields.

While all Caltech students must take the five terms of introductory courses, an intensive version of the sophomore course (waves, quantum mechanics, and statistical mechanics) is offered for those planning further study in physics. The required junior-level courses give a thorough treatment of fundamental principles. Elective courses taken during the junior and senior years allow students to explore their particular interests. Some electives offer broad surveys, while others concentrate on particular fields of current research. A choice of laboratory courses is offered at several levels. Students are encouraged to become active participants in research on campus. Academic credit for physics work done outside of the classroom can be awarded in a variety of ways.

Students must maintain a grade-point average of 1.9 or better each year in the subjects listed under this division to remain in the physics option.

Option Requirements

The first three requirements should be completed by the end of the second year. In planning a program, note that Ph 6 and Ph 7 are each offered only once per year, in the second and third terms, respectively.

1. Ph 3.
2. Ph 6¹ or APh 24.

3. Ph 7.
4. 27 units of Ph 78, or 18 units of Ph 77, or 9 units of Ph 77 and 9 units from APh 77 or Ay 105.
5. Ph 70².
6. Ph 106.
7. Ph 125.

¹ Some laboratory courses from other options have considerable physics content, and students wishing to satisfy this requirement with such a course may petition the Physics Undergraduate Committee for approval.

² Other communication courses (e.g., E 10, Ay 30, Ma 10) may be substituted for Ph 70.

Required Electives

1. 90 units, in addition to the above, of any of the following: any Ph, Ay, or APh course numbered 100 or above, or any of Ph 5, Ph 78, Ph 79, ACM 95, ACM 101, Ma 5, Ma 108, up to 9 units of Ph 20–22, or up to 9 units of Ay 20–21. 9 units toward the 90-unit requirement will be given for taking three terms of Ph 77. Students are encouraged to take ACM 95 as part of this requirement. The pass/fail option cannot be exercised on any courses used for this requirement, with the exception of ACM 95. No more than 9 units of Ph 171–173 may apply toward this requirement without permission from the Physics Undergraduate Committee. In individual cases, this committee may allow other courses with substantial physics content to apply toward the requirement; seniors must submit their petitions for this purpose before the first day of third term.
2. 9 units of science or engineering electives outside of Ph, APh, Ma, and ACM. These units are in addition to the required Core Science Electives.
3. Passing grades must be earned in a total of 486 units, including the courses listed above.

Typical Course Schedule

		Units per term		
		1st	2nd	3rd
<i>Second Year</i>				
Ph 12	Waves, Quantum Physics, and Statistical Mechanics	9	9	9
Ma 2 ab	Sophomore Mathematics	9	9	-

Political Science Option

The political science option provides students with training in the substance and methods of modern political science, including the analysis of representative democracy, electoral institutions, the allocation of public goods, and regulatory behavior. The option emphasizes formal tools like game theory, social choice theory, and formal political theory along with quantitative methodologies to test those theories. In addition, the option encourages original research. The design of the political science option insures that students will be well suited to pursue careers in government or the private sector, as well as to pursue graduate work in political science.

Option Requirements

1. PS 12, PS 132, Ec 122.
2. Four political science courses from the list: PS 120, 123, 126, 130, 135, PS/SS 139, PS 141, Law/PS/H 148 ab, PS/Ec 172.
3. PS 99 ab.
4. 36 additional units in advanced political science, economics, law, social science, psychology, or history.
5. 36 additional units in advanced social science, science, engineering, or mathematics.
6. Passing grades must be earned in a total of 486 units, including all courses used to satisfy the above requirements.

Typical Course Schedule

		<i>Units per term</i>		
		<i>1st</i>	<i>2nd</i>	<i>3rd</i>
<i>Second Year</i>

Structural Mechanics Minor

This minor is intended to supplement one of Caltech's undergraduate degrees and is designed for students who wish to broaden their knowledge beyond their normal major, especially for those who wish to join the structural engineering profession after graduation or pursue a graduate degree in structural mechanics or structural engineering. Students completing the structural mechanics minor requirements will have the phrase "minor in structural mechanics" added to their academic transcripts.

Minor Requirements

The student must complete 54 units of classes selected from Ae/AM/CE 102 abc, AM/CE 151 abc and CE 160 abc, and obtain a grade of B- or higher. Courses taken as part of the structural mechanics minor are counted toward the total 486-unit Institute graduation requirement.
